

FELICITAS PRIVATE MARKETS FUND

STATEMENT OF ADDITIONAL INFORMATION

Class Y Shares (Ticker Symbol: FPMYX)

Class I Shares (Ticker Symbol: FPMIX)

Dated October 31, 2024

c/o UMB Fund Services, Inc.
235 West Galena Street Milwaukee, WI 53212
(888) 884-8810

This Statement of Additional Information (“SAI”) is not a prospectus. This SAI relates to and should be read in conjunction with the prospectus (the “Prospectus”) of Felicitas Private Markets Fund (the “Fund”) dated October 31, 2024, and as it may be further amended or supplemented from time to time. This SAI is incorporated by reference in its entirety into the Prospectus. The Fund’s audited financial statements and financial highlights appearing in the Annual Report to Shareholders for the fiscal year ended June 30, 2024 (the “Annual Report”) are incorporated by reference into this SAI. No other part of the Annual Report is incorporated by reference herein. A copy of the Prospectus and Annual Report may be obtained without charge by contacting the Fund at the telephone number or address set forth above. You may also obtain the Prospectus and Annual Report by visiting <https://www.skypointfunds.com>.

This SAI is not an offer to sell shares of beneficial interest (“Shares”) of the Fund and is not soliciting an offer to buy Shares in any state where the offer or sale is not permitted.

Capitalized terms not otherwise defined herein have the same meaning set forth in the Prospectus.

Shares are distributed by UMB Distribution Services, LLC (the “Distributor” or “UMBDS”) to institutions and financial intermediaries that may distribute Shares to clients and customers (including affiliates and correspondents) of the Fund’s investment adviser, Skypoint Capital Advisors, LLC (the “Investment Adviser”), and to clients and customers of other organizations. Felicitas Global Partners, LLC serves as investment sub-adviser to the Fund (the “Investment Sub-Adviser” or “Sub-Adviser” and, together with the Investment Adviser, the “Advisers”). The Fund’s Prospectus, which is dated October 31, 2024, provides basic information investors should know before investing. This SAI is intended to provide additional information regarding the activities and operations of the Fund and should be read in conjunction with the Prospectus.

GENERAL INFORMATION

Felicitas Private Markets Fund (the “Fund”) is a newly organized Delaware statutory trust registered under the Investment Company Act of 1940, as amended (the “Investment Company Act”), as a non-diversified, closed-end management investment company.

INVESTMENT POLICIES AND PRACTICES

The investment objective of the Fund, as well as the principal investment strategies of the Fund and the principal risks associated with such investment strategies, are set forth in the Prospectus. Certain additional information regarding the investment program of the Fund is set forth below.

FUNDAMENTAL POLICIES

The Fund’s fundamental policies, which are listed below, may only be changed by the affirmative vote of a majority of the outstanding voting securities of the Fund. At the present time, the Shares are the only outstanding voting securities of the Fund. As defined by the Investment Company Act, the vote of a “majority of the outstanding voting securities of the Fund” means the vote, at an annual or special meeting of the Shareholders of the Fund (“Shareholders”), duly called, (i) of 67% or more of the Shares represented at such meeting, if the holders of more than 50% of the outstanding Shares are present in person or represented by proxy or (ii) of more than 50% of the outstanding Shares, whichever is less. No other policy is a fundamental policy of the Fund, except as expressly stated. Within the limits of the fundamental policies of the Fund, the management of the Fund has reserved freedom of action. The Fund may not:

- (1) Issue any senior security, except to the extent permitted by Section 18 of the Investment Company Act, as interpreted, modified, or otherwise permitted by the Securities and Exchange Commission (the “SEC”) or any other applicable authority.
- (2) Borrow money, except to the extent permitted by Section 18 of the Investment Company Act, as interpreted, modified, or otherwise permitted by the SEC or any other applicable authority. This investment restriction does not apply to borrowings from affiliated investment companies or other affiliated persons of the Fund to the extent permitted by the Investment Company Act, the SEC or any other applicable authority.
- (3) Underwrite securities of other issuers, except insofar as the Fund may be deemed to be an underwriter under the Securities Act of 1933, as amended, in connection with the disposition of its portfolio securities.
- (4) Make loans, except through purchasing fixed-income securities, lending portfolio securities, or entering into repurchase agreements in a manner consistent with the investment policies of the Fund, or as otherwise permitted under the Investment Company Act. This investment restriction does not apply to loans to affiliated investment companies or other affiliated persons of the Fund to the extent permitted by the Investment Company Act, the SEC or any other applicable authority.
- (5) Purchase, hold or deal in real estate, except that the Fund may invest in securities that are secured by real estate, including, without limitation, mortgage-related securities, or that are issued by companies or partnerships that invest or deal in real estate or real estate investment trusts, and may hold and dispose of real estate acquired by the Fund as a result of the ownership of securities or other permitted investments.
- (6) Invest in commodities and commodity contracts, except that the Fund (i) may purchase and sell non-U.S. currencies, options, swaps, futures and forward contracts, including those related to indexes, options and options on indexes, as well as other financial instruments and contracts that are commodities or commodity contracts, (ii) may also purchase or sell commodities if acquired as a result of ownership of securities or other instruments, (iii) may invest in commodity pools and other entities that purchase and sell commodities and commodity contracts, and (iv) may make such investments as otherwise permitted by the Investment Company Act, and as interpreted, modified or otherwise permitted by regulatory authority having jurisdiction, from time to time.
- (7) Concentrate investments in a particular industry or group of industries, as concentration is defined under the Investment Company Act, the rules and regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time, except that the Fund may invest without limitation in securities issued or guaranteed by the U.S. government, its agencies or instrumentalities and repurchase agreements involving such securities or tax-exempt obligations of state or municipal governments and their political subdivisions.

With respect to these investment restrictions and other policies described in this SAI or the Prospectus, if a percentage restriction is adhered to at the time of an investment or transaction, a later change in percentage resulting from a change in the values of investments or the value of the Fund's total assets, unless otherwise stated, will not constitute a violation of such restriction or policy. The Fund's investment policies and restrictions do not apply to the activities and the transactions of the Investment Funds (defined below), but will apply to investments made by the Fund directly (or any account consisting solely of the Fund's assets).

The following descriptions of the Investment Company Act may assist investors in understanding the above policies and restrictions.

Borrowing. The Investment Company Act restricts an investment company from borrowing in excess of 33⅓% of its total assets (including the amount borrowed, but excluding temporary borrowings not in excess of 5% of its total assets). Transactions that are fully collateralized in a manner that does not involve the prohibited issuance of a "senior security" within the meaning of Section 18(f) of the Investment Company Act shall not be regarded as borrowings for the purposes of the Fund's investment restriction.

Concentration. The SEC staff has defined concentration as investing 25% or more of an investment company's total assets in any particular industry or group of industries, with certain exceptions such as with respect to investments in obligations issued or guaranteed by the U.S. Government or its agencies and instrumentalities. For purposes of the Fund's concentration policy, the Fund may classify and re-classify companies in a particular industry and define and re-define industries in any reasonable manner, consistent with SEC guidance. The Fund may invest in Investment Funds that concentrate their assets in one or more industries. The Fund will consider the concentration of Investment Funds when determining compliance with its concentration policy. The Fund will not invest 25% or more of its assets in an Investment Fund that has a policy to concentrate its assets in one or more industries and will take such policy into consideration for purposes of the Fund's industry concentration policy set forth in investment restriction 7.

Senior Securities. Senior securities may include any obligation or instrument issued by a fund evidencing indebtedness. The Investment Company Act generally prohibits funds from issuing senior securities unless the issuance thereof is consistent with Rule 18f-4 under the Investment Company Act, although it does not treat certain transactions as senior securities, such as certain borrowings, short sales, reverse repurchase agreements, firm commitment agreements and standby commitments, with appropriate earmarking or segregation of assets to cover such obligation.

NON-FUNDAMENTAL POLICIES

THE FUND MAY CHANGE ITS INVESTMENT OBJECTIVE, POLICIES, RESTRICTIONS, STRATEGIES, AND TECHNIQUES.

As discussed in the Prospectus, the Fund's investment objective is to deliver a combination of yield and capital appreciation. The Fund intends to seek its investment objective through a portfolio of private equity, private credit and real estate investments. The Fund's investment objective and investment strategies (except those indicated below) are not fundamental policies of the Fund and may be changed by the Board of Trustees of the Fund ("Board") without the vote of a majority (as defined by the Investment Company Act) of the Fund's outstanding Shares. Under normal circumstances, the Fund seeks to achieve its objective by investing at least 80% of its net assets (plus the amount of any borrowings for investment purposes) in "private assets". The Fund will provide shareholders with at least 60 days' notice prior to changing this 80% policy.

ADDITIONAL INFORMATION ON INVESTMENT TECHNIQUES OF THE FUND AND RELATED RISKS

The following information supplements the discussion of the Fund's investment policies and techniques in the Prospectus.

Equity Securities

The investment portfolios of Investment Funds will include long and short positions in common stocks, preferred stocks and convertible securities of U.S. and foreign issuers. The value of equity securities depends on business, economic and other factors affecting those issuers. Equity securities fluctuate in value, often based on factors unrelated to the value of the issuer of the securities, and such fluctuations can be pronounced.

Underlying Managers may generally invest Investment Funds' assets in equity securities without restriction. These investments may include securities of companies with small- to medium-sized market capitalizations, including micro-cap companies and growth stage companies. The securities of certain companies, particularly smaller-capitalization companies, involve higher risks in some respects than do investments in securities of larger companies. For example, prices of small-capitalization and even medium-capitalization stocks are often more volatile than prices of large-capitalization stocks, and the risk of bankruptcy or insolvency of many smaller companies (with the attendant losses to investors) is higher than for larger, "blue-chip" companies. In addition, due to thin trading in the securities of some small-capitalization companies, an investment in those companies may be illiquid.

Fixed-Income Securities

Investment Funds may invest in fixed-income securities. An Underlying Manager will invest in these securities when their yield and potential for capital appreciation are considered sufficiently attractive, and also may invest in these securities for defensive purposes and to maintain liquidity. Fixed-income securities include bonds, notes and debentures issued by U.S. and foreign corporations and governments. These securities may pay fixed, variable or floating rates of interest, and may include zero coupon obligations. Fixed-income securities are subject to the risk of the issuer's inability to meet principal and interest payments on its obligations (i.e., credit risk) and are subject to the risk of price volatility due to such factors as interest rate sensitivity, market perception of the creditworthiness or financial condition of the issuer and general market liquidity (i.e., market risk). Certain portfolio securities, such as those with interest rates that fluctuate directly or indirectly based on multiples of a stated index, are designed to be highly sensitive to changes in interest rates and can subject the holders thereof to significant reductions of yield and possible loss of principal.

Investment Funds may invest in both investment grade and non-investment grade debt securities (commonly referred to as "junk bonds"). Investment grade debt securities are securities that have received a rating from at least one nationally recognized statistical rating organization (a "Rating Agency") in one of the four highest rating categories or, if not rated by any Rating Agency, have been determined by an Underlying Manager to be of comparable quality.

An Investment Fund's investments in non-investment grade debt securities, including convertible debt securities, are considered by the Rating Agencies to be predominantly speculative with respect to the issuer's capacity to pay interest and repay principal. Non-investment grade securities in the lowest rating categories may involve a substantial risk of

default or may be in default. Adverse changes in economic conditions or developments regarding the individual issuer are more likely to cause price volatility and weaken the capacity of the issuers of non-investment grade securities to make principal and interest payments than is the case for higher grade securities. In addition, the market for lower grade securities may be thinner and less liquid than the market for higher grade securities.

Non-U.S. Securities

Investment Funds may invest in equity and fixed-income securities of non-U.S. issuers and in depositary receipts, such as American Depositary Receipts (“ADRs”), that represent indirect interests in securities of non-U.S. issuers. Non-U.S. securities in which Investment Funds may invest may be listed on non-U.S. securities exchanges or traded in non-U.S. over-the-counter markets or may be purchased in private placements and not be publicly traded. Investments in non-U.S. securities are affected by risk factors generally not thought to be present in the U.S.

As a general matter, Investment Funds are not required to hedge against non-U.S. currency risks, including the risk of changing currency exchange rates, which could reduce the value of non-U.S. currency denominated portfolio securities irrespective of the underlying investment. However, from time to time, an Investment Fund may enter into forward currency exchange contracts (“forward contracts”) for hedging purposes and non-hedging purposes to pursue its investment objective. Forward contracts are transactions involving the Investment Fund’s obligation to purchase or sell a specific currency at a future date at a specified price. Forward contracts may be used by the Investment Fund for hedging purposes to protect against uncertainty in the level of future non-U.S. currency exchange rates, such as when the Investment Funds anticipates purchasing or selling a non-U.S. security. This technique would allow the Investment Fund to “lock in” the U.S. dollar price of the security. Forward contracts also may be used to attempt to protect the value of the Investment Fund’s existing holdings of non-U.S. securities. There may be, however, imperfect correlation between the Investment Fund’s non-U.S. securities holdings and the forward contracts entered into with respect to such holdings. Forward contracts also may be used for non-hedging purposes to pursue the Fund’s or an Investment Fund’s investment objective, such as when an Underlying Manager anticipates that particular non-U.S. currencies will appreciate or depreciate in value, even though securities denominated in such currencies are not then held in the Fund’s or Investment Fund’s investment portfolio.

ADRs involve substantially the same risks as investing directly in securities of non-U.S. issuers, as discussed above. ADRs are receipts typically issued by a U.S. bank or trust company that show evidence of underlying securities issued by a non-U.S. corporation. Issuers of unsponsored depositary receipts are not obligated to disclose material information in the United States, and therefore, there may be less information available regarding such issuers.

Money Market Instruments

The Fund or Investment Funds may invest during periods of adverse market or economic conditions for defensive purposes some or all of their assets in high quality money market instruments and other short-term obligations, money market mutual funds or repurchase agreements with banks or broker-dealers or may hold cash or cash equivalents in such amounts as deemed appropriate under the circumstances. The Fund or Investment Funds also may invest in these instruments for liquidity purposes pending allocation of their respective offering proceeds and other circumstances. Money market instruments are high quality, short-term fixed-income obligations, which generally have remaining maturities of one year or less, and may include U.S. government securities, commercial paper, certificates of deposit and bankers’ acceptances issued by domestic branches of United States banks that are members of the Federal Deposit Insurance Corporation, and repurchase agreements.

Special Investment Techniques

Investment Funds may use a variety of special investment techniques as more fully discussed below to hedge a portion of their investment portfolios against various risks or other factors that generally affect the values of securities. They may also use these techniques for non-hedging purposes in pursuing their investment objectives. These techniques may involve the use of derivative transactions. The techniques Investment Funds may employ may change over time as new instruments and techniques are introduced or as a result of regulatory developments. Certain of the special investment techniques that Investment Funds may use are speculative and involve a high degree of risk, particularly when used for non-hedging purposes. It is possible that any hedging transaction may not perform as anticipated and that an Investment Fund may suffer losses as a result of its hedging activities.

Options and Futures

The Underlying Managers may utilize options and futures contracts. Such transactions may be effected on securities exchanges, in the over-the-counter market, or negotiated directly with counterparties. When such transactions are purchased over-the-counter or negotiated directly with counterparties, an Investment Fund bears the risk that the counterparty will be unable or unwilling to perform its obligations under the contract. Such transactions may also be illiquid and, in such cases, an Underlying Manager may have difficulty closing out its position. Over-the-counter options purchased and sold by Investment Funds may include options on baskets of specific securities. An Investment Fund may utilize European-style or American-style options. European-style options are only exercisable at their expiration. American-style options are exercisable at any time prior to the expiration date of the option.

The Underlying Managers may purchase call and put options on specific securities, on indices, on currencies or on futures, and may write and sell covered or uncovered call and put options for hedging purposes and non-hedging purposes to pursue their investment objectives. A put option gives the purchaser of the option the right to sell, and obligates the writer to buy, the underlying security at a stated exercise price. Similarly, a call option gives the purchaser of the option the right to buy, and obligates the writer to sell, the underlying security at a stated exercise price. A covered call option is a call option with respect to which an Investment Fund owns the underlying security. The sale of such an option exposes an Investment Fund during the term of the option to possible loss of opportunity to realize appreciation in the market price of the underlying security or to possible continued holding of a security that might otherwise have been sold to protect against depreciation in the market price of the security. A covered put option is a put option with respect to which cash or liquid securities have been placed in a segregated account on an Investment Fund's books. The sale of such an option exposes the seller during the term of the option to a decline in price of the underlying security while also depriving the seller of the opportunity to invest the segregated assets. Options sold by the Investment Funds need not be covered.

An Investment Fund may close out a position when writing options by purchasing an option on the same security with the same exercise price and expiration date as the option that it has previously written on the security. The Investment Fund will realize a profit or loss if the amount paid to purchase an option is less or more, as the case may be, than the amount received from the sale thereof. To close out a position as a purchaser of an option, an Underlying Manager would ordinarily effect a similar "closing sale transaction," which involves liquidating a position by selling the option previously purchased, although the Underlying Manager could exercise the option should it deem it advantageous to do so.

Investment Funds may enter into futures contracts in U.S. domestic markets or on exchanges located outside the United States. Foreign markets may offer advantages such as trading opportunities or arbitrage possibilities not available in the United States. Foreign markets, however, may have greater risk potential than domestic markets. For example, some foreign exchanges are principal markets so that no common clearing facility exists and an investor may look only to the broker for performance of the contract. In addition, any profits that might be realized in trading could be eliminated by adverse changes in the exchange rate, or a loss could be incurred as a result of those changes. Transactions on foreign exchanges may include both commodities which are traded on domestic exchanges and those which are not. Unlike trading on domestic commodity exchanges, trading on foreign commodity exchanges is not regulated by the Commodity Futures Trading Commission ("CFTC").

Engaging in these transactions involves risk of loss, which could adversely affect the value of the Fund's net assets. No assurance can be given that a liquid market will exist for any particular futures contract at any particular time. Many futures exchanges and boards of trade limit the amount of fluctuation permitted in futures contract prices during a single trading day. Once the daily limit has been reached in a particular contract, no trades may be made that day at a price beyond that limit or trading may be suspended for specified periods during the trading day. Futures contract prices could move to the limit for several consecutive trading days with little or no trading, thereby preventing prompt liquidation of futures positions and potentially subjecting an Investment Fund to substantial losses.

Successful use of futures also is subject to an Underlying Manager's ability to correctly predict movements in the direction of the relevant market, and, to the extent the transaction is entered into for hedging purposes, to ascertain the appropriate correlation between the transaction being hedged and the price movements of the futures contract.

Some or all of the Underlying Managers may purchase and sell stock index futures contracts for an Investment Fund. A stock index future obligates an Investment Fund to pay or receive an amount of cash equal to a fixed dollar amount specified in the futures contract multiplied by the difference between the settlement price of the contract on the contract's last trading day and the value of the index based on the stock prices of the securities that comprise it at the opening of trading in those securities on the next business day.

Some or all of the Underlying Managers may purchase and sell interest rate futures contracts for an Investment Fund. A contract for interest rate futures represents an obligation to purchase or sell an amount of a specific debt security at a future date at a specific price.

Some or all of the Underlying Managers may purchase and sell currency futures for an Investment Fund. A currency future creates an obligation to purchase or sell an amount of a specific currency at a future date at a specific price.

The Fund intends to rely on the no-action relief provided by No-Action Letter 12-38 of the Division of Swap Dealer and Intermediary Oversight ("Division") of the CFTC. Pursuant to this letter, the Investment Adviser is not required to register as a "commodity pool operator" ("CPO") with respect to the Fund, or rely on an exemption from registration, until the later of June 30, 2013 or six months from the date the Division issues revised guidance on the application of the calculation of the de minimis thresholds to fund-of-funds operators. As of the date of this Prospectus, the CFTC has not yet proposed any guidance regarding the application of the de minimis thresholds to fund-of-funds operators. If the Fund and the Advisers with respect to the Fund become subject to CFTC regulation, the Fund may incur additional compliance, operational and other expenses.

With respect to investments in swap transactions, commodity futures, commodity options or certain other derivatives used for purposes other than *bona fide* hedging purposes, an investment company must meet one of the following tests under the amended regulations in order to claim an exemption from being considered a "commodity pool" or the investment adviser having to register as a CPO. First, the aggregate initial margin and premiums required to establish an investment company's positions in such investments may not exceed five percent (5%) of the liquidation value of the investment company's portfolio (after accounting for unrealized profits and unrealized losses on any such investments). Alternatively, the aggregate net notional value of such instruments, determined at the time of the most recent position established, may not exceed one hundred percent (100%) of the liquidation value of the investment company's portfolio (after accounting for unrealized profits and unrealized losses on any such positions). In addition to meeting one of the foregoing trading limitations, the investment company may not market itself as a commodity pool or otherwise as a vehicle for trading in the commodity futures, commodity options or swaps and derivatives markets. In the event that the Investment Adviser is required to register as a CPO with respect to the Fund, the disclosure and operations of the Fund would need to comply with all applicable CFTC regulations.

Options on Securities Indexes

Some or all of the Underlying Managers may purchase and sell for the Investment Funds call and put options on stock indexes listed on national securities exchanges or traded in the over-the-counter market for hedging purposes and non-hedging purposes to pursue their investment objectives. A stock index fluctuates with changes in the market values of the stocks included in the index. Accordingly, successful use by an Underlying Manager of options on stock indexes will be subject to the Underlying Manager's ability to predict correctly movements in the direction of the stock market generally or of a particular industry or market segment. This requires different skills and techniques than predicting changes in the price of individual stocks.

Warrants and Rights

Warrants are derivative instruments that permit, but do not obligate, the holder to subscribe for other securities or commodities. Rights are similar to warrants, but normally have a shorter duration and are offered or distributed to shareholders of a company. Warrants and rights do not carry with them the right to dividends or voting rights with respect to the securities that they entitle the holder to purchase, and they do not represent any rights in the assets of the issuer. In addition, the values of warrants and rights do not necessarily change with the values of the underlying securities or commodities and these instruments cease to have value if they are not exercised prior to their expiration dates. As a result, warrants and rights may be considered more speculative than certain other types of equity-like securities.

Swap Agreements

The Underlying Managers may enter into equity, interest rate, index and currency rate swap agreements on behalf of Investment Funds. These transactions are entered into in an attempt to obtain a particular return when it is considered desirable to do so, possibly at a lower cost than if an investment was made directly in the asset that yielded the desired return. Swap agreements are two-party contracts entered into primarily by institutional investors for periods ranging from a few weeks to more than a year. In a standard swap transaction, two parties agree to exchange the returns (or differentials in rates of return) earned or realized on particular predetermined investments or instruments, which may be adjusted for an interest factor. The gross returns to be exchanged or “swapped” between the parties are generally calculated with respect to a “notional amount,” i.e., the return on or increase in value of a particular dollar amount invested at a particular interest rate, in a particular foreign currency, or in a “basket” of securities representing a particular index. Forms of swap agreements include interest rate caps, under which, in return for a premium, one party agrees to make payments to the other to the extent interest rates exceed a specified rate or “cap”; interest rate floors, under which, in return for a premium, one party agrees to make payments to the other to the extent interest rates fall below a specified level or “floor”; and interest rate collars, under which a party sells a cap and purchases a floor or vice versa in an attempt to protect itself against interest rate movements exceeding given minimum or maximum levels.

Most swap agreements entered into by an Investment Fund would require the calculation of the obligations of the parties to the agreements on a “net basis.” Consequently, an Investment Fund’s current obligations (or rights) under a swap agreement generally will be equal only to the net amount to be paid or received under the agreement based on the relative values of the positions held by each party to the agreement (the “net amount”). The risk of loss with respect to swaps is limited to the net amount of interest payments that a party is contractually obligated to make. If the other party to a swap defaults, an Investment Fund’s risk of loss consists of the net amount of payments that it contractually is entitled to receive.

To achieve investment returns equivalent to those achieved by an Underlying Manager in whose investment vehicles the Fund could not invest directly, perhaps because of its investment minimum or its unavailability for direct investment, the Fund may enter into swap agreements under which the Fund may agree, on a net basis, to pay a return based on a floating interest rate and to receive the total return of the reference investment vehicle over a stated time period. The Fund may seek to achieve the same investment result through the use of other derivatives in similar circumstances. The U.S. federal income tax treatment of swap agreements and other derivatives used in the above manner is unclear. The Fund does not currently intend to use swaps or other derivatives in this manner.

Lending Portfolio Securities

An Investment Fund may lend securities from its portfolio to brokers, dealers and other financial institutions needing to borrow securities to complete certain transactions. The Investment Fund continues to be entitled to payments in amounts equal to the interest, dividends or other distributions payable on the loaned securities which affords the Investment Fund an opportunity to earn interest on the amount of the loan and on the loaned securities’ collateral. An Investment Fund generally will receive collateral consisting of cash, U.S. government securities or irrevocable letters of credit which will be maintained at all times in an amount equal to at least 100% of the current market value of the loaned securities. The Investment Fund might experience risk of loss if the institution with which it has engaged in a portfolio loan transaction breaches its agreement with the Investment Fund.

When-Issued, Delayed Delivery and Forward Commitment Securities

To reduce the risk of changes in securities prices and interest rates, an Investment Fund may purchase securities on a forward commitment, when-issued or delayed delivery basis, which means delivery and payment take place a number of days after the date of the commitment to purchase. The payment obligation and the interest rate receivable with respect to such purchases are fixed when the Investment Fund enters into the commitment, but the Investment Fund does not make payment until it receives delivery from the counterparty. After an Investment Fund commits to purchase such securities, but before delivery and settlement, it may sell the securities if it is deemed advisable.

Securities purchased on a forward commitment or when-issued or delayed delivery basis are subject to changes in value, generally changing in the same way, i.e., appreciating when interest rates decline and depreciating when interest rates rise, based upon the public’s perception of the creditworthiness of the issuer and changes, real or anticipated, in the level of interest rates. Securities so purchased may expose an Investment Fund to risks because they may experience such fluctuations prior to their actual delivery. Purchasing securities on a when-issued or delayed delivery

basis can involve the additional risk that the yield available in the market when the delivery takes place actually may be higher than that obtained in the transaction itself. Purchasing securities on a forward commitment, when-issued or delayed delivery basis when an Investment Fund is fully or almost fully invested results in a form of leverage and may result in greater potential fluctuation in the value of the net assets of an Investment Fund. In addition, there is a risk that securities purchased on a when-issued or delayed delivery basis may not be delivered and that the purchaser of securities sold by an Investment Fund on a forward basis will not honor its purchase obligation. In such cases, the Investment Fund may incur a loss.

Leverage

In addition to the use of leverage by the Underlying Managers in their respective trading strategies, the Investment Sub-Adviser may leverage the Fund's allocations to the Underlying Managers through (i) borrowings, (ii) swap agreements, options or other derivative instruments, (iii) employing certain Underlying Managers (many of which trade on margin and do not generally need additional capital from the Fund in order to increase the level of the positions they acquire for it) to trade notional equity in excess of the equity actually available in their accounts, or (iv) a combination of these methods. The financing entity or counterparty on any swap, option or other derivative instrument may be any entity or institution which the Investment Sub-Adviser determines to be creditworthy.

Thus the Fund, through its leveraged investments in the Investment Funds and through each Underlying Manager's use of leverage in its trading strategies, uses leverage with respect to the Shares. As a result of that leverage, a relatively small movement in the spread relationship between the securities and commodities interests the Fund indirectly owns and those which it has indirectly sold short may result in substantial losses.

Investors also should note that the leverage the Underlying Managers employ in their Investment Fund trading can result in an investment portfolio significantly greater than the assets allocated to their trading, which can greatly increase the Fund's profits or losses as compared to its net assets. The Underlying Managers' anticipated use of short-term margin borrowings results in certain additional risks to the Fund. For example, should the securities that are pledged to brokers to secure the Underlying Managers' margin Investment Funds decline in value, or should brokers from which the Underlying Managers have borrowed increase their maintenance margin requirements (*i.e.*, reduce the percentage of a position that can be financed), then the Underlying Managers could be subject to a "margin call," pursuant to which the Underlying Managers must either deposit additional funds with the broker or suffer mandatory liquidation of the pledged securities to compensate for the decline in value. In the event of a precipitous drop in the value of the assets of an Underlying Manager, the Underlying Manager might not be able to liquidate assets quickly enough to pay off the margin debt and might suffer mandatory liquidation of positions in a declining market at relatively low prices, thereby incurring substantial losses.

Short Selling

The Underlying Managers may engage in short selling. Short selling involves selling securities that are not owned and borrowing the same securities for delivery to the purchaser, with an obligation to replace the borrowed securities at a later date. Short selling allows an investor to profit from declines in market prices to the extent such declines exceed the transaction costs and the costs of borrowing the securities. A short sale creates the risk of an unlimited loss, as the price of the underlying security could theoretically increase without limit, thus increasing the cost of buying those securities to cover the short position. There can be no assurance that the securities necessary to cover a short position will be available for purchase. Purchasing securities to close out the short position can itself cause the price of the securities to rise further, thereby exacerbating the loss. For these reasons, short selling is considered a speculative investment practice.

Investment Funds may also effect short sales "against the box." These transactions involve selling short securities that are owned (or that an Investment Fund has the right to obtain). When an Investment Fund enters into a short sale against the box, it will set aside securities equivalent in kind and amount to the securities sold short (or securities convertible or exchangeable into such securities) and will hold such securities while the short sale is outstanding. Investment Funds will incur transaction costs, including interest expenses, in connection with opening, maintaining and closing short sales against the box.

OTHER POTENTIAL RISKS AND ADDITIONAL INVESTMENT INFORMATION

Dependence on the Investment Adviser, Sub-Adviser, and Underlying Managers

The Fund invests its assets primarily in a number of funds managed by Underlying Managers, selected by the Sub-Adviser. The success of the Fund depends upon the ability of the Sub-Adviser to develop and implement investment strategies that achieve the investment objective of the Fund, and upon the ability of the Underlying Managers to develop and implement strategies that achieve their respective investment objectives. Shareholders will have no right or power to participate in the management or control of the Fund or the Investment Funds, and will not have an opportunity to evaluate the specific investments made by the Investment Funds or the Underlying Managers, or the terms of any such investments.

Compensation Arrangements with the Underlying Managers

Underlying Managers may receive compensation based on the performance of their investments. Such compensation arrangements may create an incentive to make investments that are riskier or more speculative than would be the case if such arrangements were not in effect. In addition, because performance-based compensation is calculated on a basis that includes unrealized appreciation of an Investment Fund's assets, such performance-based compensation may be greater than if such compensation were based solely on realized gains.

Business and Regulatory Risks

Legal, tax and regulatory developments that may adversely affect the Fund, the Underlying Managers or the Investment Funds could occur during the term of the Fund. Securities and other investment markets are subject to comprehensive statutes, regulations and margin requirements enforced by the SEC, other regulators and self-regulatory organizations and exchanges authorized to take extraordinary actions in the event of market emergencies. The regulation of derivatives transactions and funds that engage in such transactions is an evolving area of law and is subject to modification by government and judicial actions. The regulatory environment for private funds is evolving, and changes in the regulation of private funds and their trading activities may adversely affect the ability of the Fund to pursue its investment strategy and the value of investments held by the Fund. There has been an increase in governmental, as well as self-regulatory, scrutiny of the alternative investment industry in general. It is impossible to predict what, if any, changes in regulations may occur, but any regulations which restrict the ability of the Fund to trade in securities or the ability of the Fund to employ, or brokers and other counterparties to extend, credit in its trading (as well as other regulatory changes that result) could have a material adverse impact on the Fund's portfolio.

Control Positions

Investment Funds may take control positions in companies. The exercise of control over a company imposes additional risks of liability for environmental damage, product defects, failure to supervise and other types of liability related to business operations. In addition, the act of taking a control position, or seeking to take such a position, may itself subject an Investment Fund to litigation by parties interested in blocking it from taking that position. If those liabilities were to arise, or such litigation were to be resolved in a manner adverse to the Investment Funds, the Investment Funds likely would suffer losses on their investments. Additionally, should an Investment Fund obtain such a position, such entity may be required to make filings concerning its holdings with the SEC and it may become subject to other regulatory restrictions that could limit the ability of such Investment Fund to dispose of its holdings at a preferable time and in a preferable manner. Violations of these regulatory requirements could subject the Investment Fund to significant liabilities.

Effect of Investor Withdrawals on an Underlying Manager's Ability to Influence Corporate Change

From time to time an Investment Fund may acquire enough of a company's shares or other equity to enable its Underlying Manager, either alone or together with the members of any group with which the Underlying Manager is acting, to influence the company to take certain actions, with the intent that such actions will maximize shareholder value. If the investors of such an Investment Fund request withdrawals representing a substantial portion of the Investment Fund's assets during any period when its Underlying Manager (or members of any such group) are seeking to influence any such corporate changes, the Underlying Manager may be compelled to sell some or all of the Investment Fund's

holdings of the shares or other equity issued by such company in order to fund such investor withdrawal requests. This may adversely impact, or even eliminate, the Underlying Manager's (or the group's) ability to influence such changes and, thus, to influence shareholder value, possibly resulting in losses to the Investment Fund and subsequently, the Fund.

Reliance on Key Personnel of the Investment Sub-Adviser

The Fund's ability to identify and invest in attractive opportunities is dependent upon the Sub-Adviser. If one or more of the key individuals leaves the Sub-Adviser or is temporarily or permanently incapacitated, the Sub-Adviser may not be able to hire qualified replacements, or may require an extended time to do so. This could prevent the Fund from achieving its investment objective.

Dilution

If an Underlying Manager limits the amount of capital that may be contributed to an Investment Fund by the Fund, additional sales of Shares of the Fund will dilute the participation of existing Shareholders in the indirect returns to the Fund from such Investment Fund.

Indirect Investment in Investment Funds

Any transaction by which the Fund indirectly gains exposure to an Investment Fund by the purchase of a swap or other contract is subject to special risks. The Fund's use of such instruments can result in volatility, and each type of instrument is subject to special risks. Indirect investments generally will be subject to transaction and other fees that will reduce the value of the Fund's investment in an Investment Fund. There can be no assurance that the Fund's indirect investment in an Investment Fund will have the same or similar results as a direct investment in the Investment Fund, and the Fund's value may decrease as a result of such indirect investment.

Counterparty Insolvency

The Fund's and the Investment Funds' assets may be held in one or more funds maintained for the Fund or the Investment Funds by counterparties, including their prime brokers. There is a risk that any of such counterparties could become insolvent. The insolvency of such counterparties is likely to impair the operational capabilities or the assets of the Investment Funds and the Fund. If one or more of the Investment Funds' counterparties were to become insolvent or the subject of liquidation proceedings in the United States (either under the Securities Investor Protection Act or the United States Bankruptcy Code), there exists the risk that the recovery of the Investment Funds' securities and other assets from such prime broker or broker-dealer will be delayed or be of a value less than the value of the securities or assets originally entrusted to such prime broker or broker-dealer.

In addition, the Investment Funds may use counterparties located in various jurisdictions outside the United States. Such local counterparties are subject to various laws and regulations in various jurisdictions that are designed to protect their customers in the event of their insolvency. However, the practical effect of these laws and their application to the Investment Funds' assets are subject to substantial limitations and uncertainties. Because of the large number of entities and jurisdictions involved and the range of possible factual scenarios involving the insolvency of a counterparty, it is impossible to generalize about the effect of their insolvency on the Investment Funds and their assets and the Fund. The insolvency of any counterparty would result in a loss to the Fund, which could be material.

Financial Failure of Intermediaries

There is always the possibility that the institutions, including brokerage firms and banks, with which the Fund does business, or to which securities have been entrusted for custodial purposes, will encounter financial difficulties that may impair their operational capabilities or result in losses to the Fund.

Suspensions of Trading

Each exchange typically has the right to suspend or limit trading in all securities that it lists. Such a suspension could render it impossible for an Investment Fund to liquidate its positions and thereby expose it to losses. In addition, there is no guarantee that non-exchange markets will remain liquid enough for an Investment Fund to close out positions.

Enforceability of Claims Against Investment Funds

The Fund has no assurances that it will be able to: (1) effect service of process within the U.S. on foreign Investment Funds; (2) enforce judgments obtained in U.S. courts against foreign Investment Funds based upon the civil liability provisions of the U.S. federal securities laws; (3) enforce, in an appropriate foreign court, judgments of U.S. courts based upon the civil liability provisions of the U.S. federal securities laws; and (4) bring an original action in an appropriate foreign court to enforce liabilities against an Investment Fund or other person based upon the U.S. federal securities laws. It is unclear whether Shareholders would ever be able to bring claims directly against the Investment Funds, domestic or foreign, or whether all such claims must be brought by the Board on behalf of Shareholders.

Cyber Security Risk

The Fund and its service providers may be prone to operational and information security risks resulting from breaches in cyber security. A breach in cyber security refers to both intentional and unintentional events that may cause the Fund to lose proprietary information, suffer data corruption, or lose operational capacity. Breaches in cyber security include, among other behaviors, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized release of confidential information or various other forms of cyber-attacks. Cyber security breaches affecting the Fund, the Advisers, financial intermediaries and other third-party service providers may adversely impact the Fund. For instance, cyber security breaches may interfere with the processing of Shareholder transactions, impact the Fund's ability to calculate its net asset value ("NAV"), cause the release of private Shareholder information or confidential business information, impede investment activities, subject the Fund to regulatory fines or financial losses and/or cause reputational damage. The Fund may also incur additional costs for cyber security risk management purposes. Similar types of cyber security risks are also present for Investment Funds and for the issuers of securities in which the Fund or an Investment Fund may invest, which could result in material adverse consequences for the Investment Funds or such issuers and may cause the Fund to lose value. The Fund and the Advisers have limited ability to prevent or mitigate cybersecurity incidents affecting third-party service providers, and such third-party service providers may have limited indemnification obligations to the Fund and the Advisers. There can be no assurance that the Fund, the Advisers, the Fund's third-party service providers, or the issuers of the securities in which the Fund invests, will not suffer losses relating to cybersecurity breaches in the future. Despite reasonable precautions, the risk remains that such incidents could occur, and that such incidents could cause damage to individual investors due to the risk of exposing confidential personal data about investors to unintended parties.

Payment in Kind for Repurchased Shares

The Fund does not expect to distribute securities as payment for repurchased Shares except in unusual circumstances, such as in the unlikely event that making a cash payment would result in a material adverse effect on the Fund or on Shareholders not requesting that their Shares be repurchased. In the event that the Fund makes such a distribution of securities as payment for Shares, Shareholders will bear any risks of the distributed securities and may be required to pay a brokerage commission or other costs to dispose of such securities.

BOARD OF TRUSTEES AND OFFICERS

The business operations of the Fund are managed and supervised under the direction of the Board, subject to the laws of the State of Delaware and the Fund’s Agreement and Declaration of Trust. The Board has overall responsibility for the management and supervision of the business affairs of the Fund on behalf of its Shareholders, including the authority to establish policies regarding the management, conduct and operation of its business. The Board exercises the same powers, authority and responsibilities on behalf of the Fund as are customarily exercised by the board of directors of a registered investment company organized as a corporation. The officers of the Fund conduct and supervise the daily business operations of the Fund.

The members of the Board (each, a “Trustee”) are not required to contribute to the capital of the Fund or to hold Shares. A majority of Trustees of the Board are not “interested persons” (as defined in the Investment Company Act) of the Fund (collectively, the “Independent Trustees”). Any Trustee who is not an Independent Trustee is an interested trustee (“Interested Trustee”).

The identity of Trustees of the Board and officers of the Fund, and their brief biographical information, including their addresses, their year of birth and descriptions of their principal occupations during the past five years is set forth below.

The Trustees serve on the Board for terms of indefinite duration. A Trustee’s position in that capacity will terminate if the Trustee is removed or resigns or, among other events, upon the Trustee’s death, incapacity or retirement. A Trustee may resign upon written notice to the other Trustees of the Fund, and may be removed either by (i) the vote of at least two-thirds of the Trustees of the Fund not subject to the removal vote or (ii) the vote of Shareholders of the Fund holding not less than two-thirds of the total number of votes eligible to be cast by all Shareholders of the Fund. In the event of any vacancy in the position of a Trustee, the remaining Trustees of the Fund may appoint an individual to serve as a Trustee so long as immediately after the appointment at least two-thirds of the Trustees of the Fund then serving have been elected by the Shareholders of the Fund. The Board may call a meeting of the Fund’s Shareholders to fill any vacancy in the position of a Trustee of the Fund, and must do so if the Trustees who were elected by the Shareholders of the Fund cease to constitute a majority of the Trustees then serving on the Board.

INDEPENDENT TRUSTEES

Name, Address and Year of Birth	Position(s) Held with the Fund	Term of Office and Length of Time Served*	Principal Occupation(s) During Past 5 Years	Number of Portfolios in Fund Complex**	Other Directorships Held by Trustees
David G. Lee Year of Birth: 1952 c/o UMB Fund Services, Inc. 235 W. The Board believes that each of the Trustees' experience, qualifications, attributes and skills on an individual basis and in combination with those of the other Trustees lead to the conclusion that each Trustee should serve in such capacity. Among the attributes common to all Trustees is the ability to review critically, evaluate, question and discuss information provided to them, to interact effectively with the other Trustees, the Advisers, the Fund's other service providers, counsel and the independent registered public accounting firm, and to exercise effective business judgment in the performance of their duties as Trustees. A Trustee's ability to perform his or her duties effectively may have been attained through the Trustee's business, consulting, and public service; experience as a board member of non-profit entities or other organizations; education or professional training; and/or other life experiences. In addition to these shared characteristics, set forth below is a brief discussion of the specific experience, qualifications, attributes or skills of each Trustee.

David G. Lee. Mr. Lee has been a Trustee since the Fund's inception. He has more than 30 years of experience in the financial services industry. The Board also benefits from his experience as a member of the board of other funds in the fund complex.

Robert Seyferth. Mr. Seyferth has been a Trustee since the Fund's inception. Mr. Seyferth has more than 35 years of business and accounting experience. The Board also benefits from his experience as a member of the board of other funds in the fund complex.

Gary E. Shugrue. Mr. Shugrue has been a Trustee since the Fund's inception. He has more than 35 years of experience in the financial service industry. The Board also benefits from his experience as a member of the board of other funds in the fund complex.

Terrance P. Gallagher. Mr. Gallagher has been a Trustee since the Fund's inception. Mr. Gallagher has more than 44 years of experience in the financial service industry. The Board also benefits from his experience as a member of the board of other funds in the fund complex.

Specific details regarding each Trustee's principal occupations during the past five years are included in the table above.

Leadership Structure and Oversight Responsibilities

Overall responsibility for oversight of the Fund rests with the Board. The Fund has engaged the Advisers to manage the Fund on a day-to-day basis. The Board is responsible for overseeing the Advisers and other service providers in the operations of the Fund in accordance with the provisions of the Investment Company Act, applicable provisions of state and other laws and the Fund's Agreement and Declaration of Trust. The Board is currently composed of four members, three of whom are Independent Trustees. The Board holds regularly scheduled meetings four times each year. In addition, the Board may hold special in-person or telephonic meetings or informal conference calls to discuss specific matters that may arise or require action between regular meetings. The Independent Trustees have also engaged independent legal counsel to assist them in performing their oversight responsibility. The Independent Trustees meet with their independent legal counsel prior to and/or during each quarterly board meeting. As described below, the Board has established an Audit Committee and a Nominating Committee, and may establish ad hoc committees or working groups from time to time to assist the Board in fulfilling its oversight responsibilities.

The Board has appointed David Lee, an Independent Trustee, to serve in the role of Chairman. The Chairman's role is to preside at all meetings of the Board and to act as liaison with the Advisers, other service providers, counsel and other Trustees generally between meetings. The Chairman serves as a key point person for dealings between management and the Trustees. The Chairman may also perform such other functions as may be delegated by the Board from time to time. The Board has determined that the Board's leadership structure is appropriate because it allows the Board to exercise informed and independent judgment over matters under its purview and it allocates areas of responsibility among committees of Trustees and the full Board in a manner that enhances effective oversight.

The Fund is subject to a number of risks, including investment, compliance, operational and valuation risks, among others. Risk oversight forms part of the Board's general oversight of the Fund and is addressed as part of various Board and committee activities. Day-to-day risk management functions are subsumed within the responsibilities of the Advisers and other service providers (depending on the nature of the risk), which carry out the Fund's investment management and business affairs. The Advisers and other service providers employ a variety of processes, procedures and controls to identify various events or circumstances that give rise to risks, to lessen the probability of their occurrence and/or to mitigate the effects of such events or circumstances if they do occur. Each of the Investment Adviser, Sub-adviser, and other service providers has its own independent interests in risk management, and their policies and methods of risk management depend on their functions and business models. The Board recognizes that it is not possible to identify all of the risks that may affect the Fund or to develop processes and controls to eliminate or mitigate their occurrence or effects. The Board requires senior officers of the Fund, including the President, Treasurer and Chief Compliance Officer, the Investment Adviser, and Sub-Adviser to report to the full Board on a variety of matters at regular and special meetings of the Board, including matters relating to risk management. The Board and the Audit Committee also receive regular reports from the Fund's independent registered public accounting firm on internal control and financial reporting matters. The Board also receives reports from certain of the Fund's other primary service providers on a periodic or regular basis, including the Fund's custodian, distributor and administrator. The Board may, at any time and in its discretion, change the manner in which it conducts risk oversight.

Committees of the Board of Trustees

Audit Committee

The Board has formed an Audit Committee that is responsible for overseeing the Fund's accounting and financial reporting policies and practices, its internal controls, and, as appropriate, the internal controls of certain service providers; overseeing the quality and objectivity of the Fund's financial statements and the independent audit of those financial statements; and acting as a liaison between the Fund's independent auditors and the full Board. In performing its responsibilities, the Audit Committee will select and recommend annually to the entire Board a firm of independent certified public accountants to audit the books and records of the Fund for the ensuing year, and will review with the firm the scope and results of each audit. The Audit Committee currently consists of each of the Fund's Independent Trustees. The Audit Committee held one meeting during the last fiscal year ended June 30, 2024.

Nominating Committee

The Board has formed a Nominating Committee that is responsible for selecting and nominating persons to serve as Trustees of the Fund. The Nominating Committee is responsible for both nominating candidates to be appointed by the Board to fill vacancies and for nominating candidates to be presented to Shareholders for election. In performing its responsibilities, the Nominating Committee will consider candidates recommended by management of the Fund and by Shareholders and evaluate them both in a similar manner, as long as the recommendation submitted by a Shareholder includes at a minimum: the name, address and telephone number of the recommending Shareholder and information concerning the Shareholder's interests in the Fund in sufficient detail to establish that the Shareholder held Shares on the relevant record date; and the name, address and telephone number of the recommended nominee and information concerning the recommended nominee's education, professional experience, and other information that might assist the Nominating Committee in evaluating the recommended nominee's qualifications to serve as a trustee. The Nominating Committee may solicit candidates to serve as trustees from any source it deems appropriate. With the Board's prior approval, the Nominating Committee may employ and compensate counsel, consultants or advisers to assist it in discharging its responsibilities. The Nominating Committee currently consists of each of the Fund's Independent Trustees. The Nominating Committee did not hold any meetings during the last fiscal year ended June 30, 2024.

Trustee and Officer Ownership of Securities

As of December 31, 2023, none of the Trustees owns Shares of the Fund.

As of September 30, 2024, the Trustees and officers of the Fund as a group owned less than one percent of the outstanding Shares of the Fund.

Independent Trustee Ownership of Securities

As of December 31, 2023, none of the Independent Trustees (or their immediate family members) owned beneficially or of record securities of the Investment Adviser, the Sub-Adviser or the Distributor, or of an entity (other than a registered investment company) controlling, controlled by or under common control with the Investment Adviser, the Sub-Adviser or the Distributor.

Trustee Compensation

In consideration of the services rendered by the Independent Trustees, the Fund will pay each Independent Trustee a retainer of \$10,000 per fiscal year. Trustees who are interested persons will be compensated by the Fund's administrator and/or its affiliates and will not be separately compensated by the Fund.

During the fiscal year ended June 30, 2024, the Fund's Trustees were compensated as follows:

Name of Trustee	Aggregate Compensation from the Fund	Total Compensation from the Fund and Fund Complex ⁽¹⁾
<i>Independent Trustees:</i>		
David G. Lee	\$ 12,500	\$ 356,500
Robert Seyferth	\$ 12,500	\$ 356,500
Gary E. Shugrue	\$ 12,500	\$ 356,500
<i>Interested Trustee:</i>		
Terrance P. Gallagher ⁽²⁾	None	None

(1) The fund complex consisted of 20 funds as of June 30, 2024.

(2) Mr. Gallagher is compensated by the Fund's Administrator and/or its affiliates and is not separately compensated by the Fund.

CODES OF ETHICS

The Fund, Investment Adviser, Sub-Adviser and Distributor have each adopted a code of ethics pursuant to Rule 17j-1 of the Investment Company Act, which is designed to prevent affiliated persons of the Fund, Investment Adviser, Sub-Adviser and Distributor from engaging in deceptive, manipulative, or fraudulent activities in connection with securities held or to be acquired by the Fund. The codes of ethics permit persons subject to them to invest in securities, including securities that may be held or purchased by the Fund, subject to a number of restrictions and controls. Compliance with the codes of ethics is carefully monitored and enforced.

The codes of ethics of the Fund, Investment Adviser and Sub-Adviser are included as exhibits to the Fund's registration statement filed with the SEC and are available on the EDGAR database on the SEC's website at <https://www.sec.gov>, and may also be obtained after paying a duplicating fee, by electronic request at the following E-mail address: publicinfo@sec.gov.

INVESTMENT MANAGEMENT AND OTHER SERVICES

The Investment Adviser

Skypoint Capital Advisors, LLC serves as the investment adviser to the Fund and is responsible for determining and implementing the Fund's overall investment strategy and for the day-to-day management of the Fund's portfolio, including selection and oversight of the Sub-Adviser and the Fund's other service providers, managing the Fund's business affairs and providing certain clerical, bookkeeping and other administrative services. The Investment Adviser is a Delaware limited liability company. The Investment Adviser is an investment adviser registered with the SEC under the Investment Advisers Act of 1940, as amended. Subject to the general supervision of the Board, and in accordance with the investment objective, policies, and restrictions of the Fund, the Investment Adviser is responsible for the management and operation of the Fund and the investment of the Fund's assets. The Investment Adviser provides such services to the Fund pursuant to the Investment Management Agreement (the "Investment Management Agreement").

The Investment Management Agreement became effective as of June 20, 2023 and will continue in effect for an initial two-year term. Thereafter, the Investment Management Agreement will continue in effect from year to year provided such continuance is specifically approved at least annually by (i) the vote of a majority of the outstanding voting securities of the Fund or a majority of the Board, and (ii) the vote of a majority of the Independent Trustees of the Fund, cast in person at a meeting called for the purpose of voting on such approval. A discussion regarding the basis for the Board's approval of the Investment Management Agreement is available in the Fund's semi-annual report to Shareholders for the six-month period ended December 31, 2023.

Pursuant the Investment Management Agreement, and in consideration of the advisory and other services provided by the Investment Adviser to the Fund, the Investment Adviser is entitled to a fee from the Fund (the "Investment Management Fee").

Investment Management Fee

Pursuant to the Investment Management Agreement, the Fund pays the Investment Adviser a quarterly Investment Management Fee equal to 1.50% on an annualized basis of the Fund's NAV as of each quarter-end, subject to certain adjustments. The Investment Management Fee is paid to the Investment Adviser before giving effect to any repurchase of Shares in the Fund effective as of that date and will decrease the net profits or increase the net losses of the Fund that are credited to its Shareholders. NAV means the total value of all assets of the Fund, less an amount equal to all accrued debts, liabilities and obligations of the Fund; provided that for purposes of determining the Investment Management Fee payable to the Investment Adviser for any quarter, NAV will be calculated prior to any reduction for any fees and expenses of the Fund for that quarter, including, without limitation, the Investment Management Fee payable to the Investment Adviser for that quarter.

During the fiscal year ended June 30, 2024, the Investment Management Fee paid by the Fund to the Investment Adviser was \$1,639,626.

The Investment Sub-Adviser

Felicitas Global Partners, LLC serves as the investment sub-adviser to the Fund and is also responsible for determining and implementing the Fund's overall investment strategy, including investment selection, initial and on-going due diligence of underlying managers, and asset allocation, and providing certain clerical, bookkeeping and other administrative services. The Sub-Adviser is a Delaware limited liability company. The Sub-Adviser is an investment adviser registered with the SEC under the Investment Advisers Act of 1940, as amended. Subject to the general supervision of the Board, and in accordance with the investment objective, policies, and restrictions of the Fund, the Sub-Adviser is responsible for the management and operation of the Fund and the investment of the Fund's assets. The Sub-Adviser provides such services to the Fund pursuant to the Investment Sub-Advisory Agreement (the "Investment Sub-Advisory Agreement").

The Investment Sub-Advisory Agreement became effective as of July 1, 2023 and will continue in effect for an initial two-year term. Thereafter, the Investment Sub-Advisory Agreement will continue in effect from year to year provided such continuance is specifically approved at least annually by (i) the vote of a majority of the outstanding voting securities of the Fund or a majority of the Board, or (ii) the vote of a majority of the Independent Trustees of the Fund, cast in person at a meeting called for the purpose of voting on such approval. A discussion regarding the basis for the Board’s approval of the Investment Sub-Advisory Agreement is available in the Fund’s semi-annual report to Shareholders for the six-month period ended December 31, 2023.

Investment Sub-Advisory Fee

Pursuant to the Investment Sub-Advisory Agreement, the Investment Adviser pays the Sub-Adviser a quarterly Investment Sub-Advisory Fee equal to 83.33% of the first \$750,000.00 of Net Management Fee received by the Investment Adviser and then 66.67% of any Net Management Fee above \$750,000.00. The “Net Management Fee” means the gross management fee (as defined by the Investment Management Agreement) paid by the Fund to the Investment Adviser for the period being measured, minus the amount of any fee waiver or expense reimbursement paid by or due from the Investment Adviser to the Fund or any service provider to the Fund (including without limitation shareholder service fees and platform fees and expenses paid by the Fund or the Investment Adviser) under an expense limitation agreement, expense cap arrangement, or other similar agreement.

Expense Limitation and Reimbursement Agreement

The Investment Adviser has entered into an expense limitation and reimbursement agreement (the “Expense Limitation and Reimbursement Agreement”) with the Fund, whereby the Investment Adviser has agreed to waive fees that it would otherwise have been paid, and/or to assume expenses of the Fund (a “Waiver”), if required to ensure the Total Annual Expenses (excluding any taxes, leverage interest, brokerage commissions, dividend and interest expenses on short sales, Incentive Fees, acquired fund fees and expenses (as determined in accordance with SEC Form N-2), expenses incurred in connection with any merger or reorganization, any shareholder servicing fees paid under the Fund’s Shareholder Service Plan and extraordinary expenses, such as litigation expenses) do not exceed 2.25% of the average daily net assets of the Fund (the “Expense Limit”) through July 1, 2025. Because taxes, leverage interest, brokerage commissions, dividend and interest expenses on short sales, Incentive Fees, acquired fund fees and expenses, expenses incurred in connection with any merger or reorganization, any shareholder servicing fees paid under the Fund’s Shareholder Service Plan and extraordinary expenses are excluded from the Expense Limit, Total Annual Expenses (after fee waivers and expense reimbursements) are expected to exceed 2.25%. The Expense Limitation and Reimbursement may not be terminated before July 1, 2025 and thereafter may be terminated by the Fund or the Investment Adviser upon 30 days’ written notice. Unless it is terminated, the Expense Limitation and Reimbursement Agreement will automatically renew for consecutive one-year terms. For a period not to exceed three years from the date on which a Waiver is made, the Investment Adviser may recoup amounts waived or assumed, provided it is able to effect such recoupment and remain in compliance with the Expense Limit in effect at the time of the Waiver and the Expense Limit at the time of the repayment.

During the fiscal year ended June 30, 2024, the Investment Adviser waived fees totaling \$401,305.

The Portfolio Managers

The personnel of the Sub-Adviser who has primary responsibility for the day-to-day management of the Fund’s portfolio (the “Portfolio Manager”) is Bonar Chhay.

Other Accounts Managed by the Portfolio Manager⁽¹⁾

	Type of Accounts	Total # of Accounts Managed	Total Assets	# of Accounts Managed that Advisory Fee Based on Performance	Total Assets that Advisory Fee Based on Performance
Bonar Chhay	Registered Investment Companies:	0	\$ 0	0	\$ 0
	Other Pooled Investment Vehicles:	0	\$ 810,699,076	8	\$ 438,790,696
	Other Accounts:	0	\$ 0	0	\$ 0

(1) As of June 30, 2024.

Conflicts of Interest

The Investment Adviser, Sub-Adviser and Portfolio Manager may manage multiple funds and/or other accounts, and as a result may be presented with one or more of the following actual or potential conflicts:

The management of multiple funds and/or other accounts may result in the Investment Adviser, Sub-Adviser or a Portfolio Manager devoting unequal time and attention to the management of each fund and/or other account. The Investment Adviser and Sub-Adviser seek to manage such competing interests for the time and attention of a Portfolio Manager by having the Portfolio Manager focus on a particular investment discipline. Most other accounts managed by a Portfolio Manager are managed using the same investment models that are used in connection with the management of the Fund.

If the Investment Adviser, Sub-Adviser or a Portfolio Manager identifies a limited investment opportunity which may be suitable for more than one fund or other account, a fund may not be able to take full advantage of that opportunity due to an allocation of filled purchase or sale orders across all eligible funds and other accounts. To deal with these situations, the Investment Adviser has adopted procedures for allocating portfolio transactions across multiple accounts.

Each of the Investment Adviser and Sub-Adviser has adopted certain compliance procedures which are designed to address these types of conflicts. However, there is no guarantee that such procedures will detect each and every situation in which a conflict arises.

Compensation of the Portfolio Manager

Mr. Chhay receives a base salary and bonus, neither of which is directly tied to the performance of the Fund, and is eligible to avail himself of the life insurance, medical and dental benefits offered to all employees of the Sub-Adviser and to participate in the Sub-Adviser's 401(k) plan. Any salary and/or bonus received by the portfolio manager is tied to the overall performance of the Sub-Adviser's overall business.

Portfolio Manager's Ownership of Shares

Bonar Chhay	\$100,001 – \$500,000

(1) As of June 30, 2024.

BROKERAGE

It is the policy of the Fund to obtain the best results in connection with effecting its portfolio transactions taking into account factors such as price, size of order, difficulty of execution and operational facilities of a brokerage firm and the firm's risk in positioning a block of securities. In most instances, the Fund will purchase interests in an Investment Fund directly from the Investment Fund, and such purchases by the Fund may be, but are generally not, subject to transaction expenses. Nevertheless, the Fund anticipates that some of its portfolio transactions (including investments in Investment Funds) may be subject to expenses. The Investment Funds incur transaction expenses in the management of their portfolios, which will decrease the value of the Fund's investment in the Investment Funds. Each Investment Fund is responsible for placing orders for the execution of its portfolio transactions and for the allocation of its brokerage. The Investment Adviser and Sub-Adviser will have no direct or indirect control over the brokerage or portfolio trading policies employed by the Underlying Managers.

During the fiscal year ended June 30, 2024, the Fund paid \$1,486 of brokerage commissions.

TAXES

The discussions of the federal tax consequences in the Prospectus and this SAI are based on the Code and the regulations issued under it, and court decisions and administrative interpretations, as in effect on the date of this SAI. The Fund intends to qualify as a regulated investment company ("RIC") under federal income tax law. As a RIC, the Fund will generally not be subject to federal corporate income taxes, provided that it distributes out to Shareholders its taxable income and gain each year. To qualify for treatment as a RIC, the Fund must meet three important tests each year.

First, the Fund must derive with respect to each taxable year at least 90% of its gross income from dividends, interest, certain payments with respect to securities loans, gains from the sale or other disposition of stock or securities or foreign currencies, other income derived with respect to its business of investing in stock, securities or currencies, or net income derived from interests in qualified publicly traded partnerships.

Second, generally, at the close of each quarter of the Fund's taxable year, at least 50% of the value of the Fund's assets must consist of cash and cash items, U.S. government securities, securities of other RICs, and securities of other issuers (as to which the Fund has not invested more than 5% of the value of its total assets in securities of the issuer and as to which the Fund does not hold more than 10% of the outstanding voting securities of the issuer), and no more than 25% of the value of the Fund's total assets may be invested in the securities of (1) any one issuer (other than U.S. government securities and securities of other regulated investment companies), (2) two or more issuers that the Fund controls and which are engaged in the same or similar trades or businesses, or (3) one or more qualified publicly traded partnerships.

Third, the Fund must distribute an amount equal to at least the sum of 90% of its investment company taxable income (net investment income and the excess of net short-term capital gain over net long-term capital loss) and 90% of its tax-exempt income, if any, for the year.

The Fund intends generally to make distributions to shareholders of all of its net income and gains for each taxable year. If the Fund were to fail to make sufficient distributions, it could be liable for corporate income tax and for excise tax in respect of the shortfall or, if the shortfall is large enough, the Fund could be disqualified as a RIC. If for any taxable year the Fund were not to qualify as a RIC, all its taxable income would be subject to tax at regular corporate rates without any deduction for distributions to Shareholders. In that event, taxable Shareholders would recognize dividend income on distributions to the extent of the Fund's current and accumulated earnings and profits, and corporate Shareholders could be eligible for the dividends-received deduction.

The Code imposes a nondeductible 4% excise tax on RICs that fail to distribute for each calendar year an amount equal to specified percentages of their ordinary taxable income and capital gain net income (excess of capital gains over capital losses). The Fund intends to make sufficient distributions or deemed distributions each calendar year to avoid liability for this excise tax.

Investments in Partnerships. The Fund will own interests in Investment Funds that are classified as partnerships for federal income tax purposes. As a partner in a partnership, the Fund will be required to recognize its allocable share of taxable income, if any, from the partnership, whether or not such income is actually distributed from the partnership

to the Fund. Accordingly, the Fund may need to borrow money or dispose of its interests in underlying funds to make the required distributions. The character of the income recognized by each Investment Fund that is a partnership will flow through to the Fund including for purposes of determining whether at least 90% of the income of the Fund is qualifying income. Accordingly, if such an Investment Fund derives income other than qualifying income, the Fund may need to take steps to avoid recognizing such nonqualifying income, including the formation of one or more corporate subsidiaries to hold a portion of the Fund's interests in such Investment Funds. The tax liability of any such corporate subsidiaries may reduce the value of the Fund.

Capital Loss Carryforwards. For federal income tax purposes, the Fund is generally permitted to carry forward a net capital loss in any year to offset its own capital gains, if any, during subsequent years.

State and Local Taxes. Although the Fund expects to qualify as a regulated investment company and to be relieved of all or substantially all federal income taxes, depending upon the extent of its activities in states and localities in which its offices are maintained, in which its agents or independent contractors are located or in which it is otherwise deemed to be conducting business, the Fund may be subject to the tax laws of such states or localities.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM; LEGAL COUNSEL

Cohen & Company, Ltd., 1835 Market St., Suite 310, Philadelphia, PA 19103, has been selected as the independent registered public accounting firm for the Fund and in such capacity will audit the Fund's annual financial statements and financial highlights.

Faegre Drinker Biddle & Reath LLP, One Logan Square, Suite 2000, Philadelphia, PA 19103-6996, serves as counsel to the Fund and the Independent Trustees.

ADMINISTRATOR

The Fund has contracted with UMB Fund Services, Inc. (the "Administrator") to provide it with certain administrative and accounting services. For the fiscal year ended June 30, 2024, the Administrator received \$124,139 in fees from the Fund.

CUSTODIAN

UMB Bank, n.a. (the "Custodian"), serves as the primary custodian of the assets of the Fund, and may maintain custody of such assets with U.S. and non-U.S. subcustodians (which may be banks, trust companies, securities depositories and clearing agencies) in accordance with the requirements of Section 17(f) of the Investment Company Act. Assets of the Fund are not held by the Investment Adviser, Sub-Adviser, or commingled with the assets of other accounts other than to the extent that securities are held in the name of the Custodian or U.S. or non-U.S. subcustodians in a securities depository, clearing agency or omnibus customer account of such custodian. The Custodian's principal business address is 1010 Grand Blvd., Kansas City, MO 64106. The Custodian is an affiliate of UMB Fund Services, Inc., which serves as the Fund's administrator.

DISTRIBUTOR

UMB Distribution Services, LLC is the distributor of Shares and is located at 235 W. Galena St., Milwaukee, Wisconsin 53212. The Distributor is a registered broker-dealer and is a member of the Financial Industry Regulatory Authority, Inc. Pursuant to the Distribution Agreement, the Distributor acts as the agent of the Fund in connection with the continuous offering of Shares of the Fund. The Distributor continually distributes Shares of the Fund on a commercially reasonable efforts basis. The Investment Adviser pays the Distributor out of its own resources a fee for certain distribution-related services. The Distributor has no obligation to sell any specific quantity of Shares. The Distributor and its officers have no role in determining the investment policies of the Fund.

ADDITIONAL PAYMENT TO FINANCIAL INTERMEDIARIES

The Investment Adviser, Sub-Adviser or its affiliates may from time to time make payments, out of their own resources, to certain financial intermediaries that sell shares of the Fund to promote the sales and retention of Fund shares by those firms and their customers. The amounts of these payments vary by intermediary. The level of payments that the Investment Adviser, Sub-Adviser or an affiliate is willing to provide to a particular intermediary may be affected by, among other factors, (i) the firm's total assets or Fund shares held in and recent net investments into the Fund, (ii) the value of the assets invested in the Fund by the intermediary's customers, (iii) redemption rates, (iv) its ability to attract and retain assets, (v) the intermediary's reputation in the industry, (vi) the level and/or type of marketing assistance and educational activities provided by the intermediary, (vii) the firm's level of participation in the Fund's sales and marketing programs, (viii) the firm's compensation program for its registered representatives who sell Fund shares and provide services to Fund shareholders, and (ix) the asset class of the Fund for which these payments are provided. Such payments are generally asset-based but also may include the payment of a lump sum.

The Investment Adviser, Sub-Adviser and/or its affiliates may also make payments to certain intermediaries for certain administrative services and shareholder processing services, including record keeping and sub-accounting of shareholder accounts pursuant to a sub-transfer agency, omnibus account service or sub-accounting agreement. All fees payable by the Investment Adviser, Sub-Adviser or an affiliate under this category of services may be charged back to the Fund, subject to approval by the Board.

The Investment Adviser, Sub-Adviser and/or its affiliates may make payments, out of its own assets, to those firms as compensation and/or reimbursement for marketing support and/or program servicing to selected intermediaries that are registered as holders or dealers of record for accounts invested in the Fund or that make Fund shares available through certain selected Fund no-transaction fee institutional platforms and fee-based wrap programs at certain financial intermediaries. Program servicing payments typically apply to employee benefit plans, such as retirement plans, or fee-based advisory programs but may apply to retail sales and assets in certain situations. The payments are based on such factors as the type and nature of services or support furnished by the intermediary and are generally asset-based. Services for which an intermediary receives marketing support payments may include, but are not limited to, business planning assistance, advertising, educating the intermediary's personnel about the Fund in connection with shareholder financial planning needs, placement on the intermediary's preferred or recommended fund list, and access to sales meetings, sales representatives and management representatives of the intermediary. In addition, intermediaries may be compensated for enabling representatives of the Investment Adviser, Sub-Adviser and/or its affiliates to participate in and/or present at conferences or seminars, sales or training programs for invited registered representatives and other employees, client and investor events and other events sponsored by the intermediary. Services for which an intermediary receives program servicing payments typically include, but are not limited to, record keeping, reporting or transaction processing and shareholder communications and other account administration services, but may also include services rendered in connection with investment selection and monitoring, employee enrollment and education, plan balance rollover or separation, or other similar services. An intermediary may perform program services itself or may arrange with a third party to perform program services. These payments, if any, are in addition to the service fee and any applicable omnibus sub-accounting fees paid to these firms with respect to these services by the Fund out of Fund assets.

From time to time, the Investment Adviser, Sub-Adviser and/or its affiliates, at its expense, may provide other compensation to intermediaries that sell or arrange for the sale of shares of the Fund, which may be in addition to marketing support and program servicing payments described above. For example, the Investment Adviser, Sub-Adviser and/or its affiliates may: (i) compensate intermediaries for National Securities Clearing Corporation networking system services (e.g., shareholder communication, account statements, trade confirmations and tax reporting) on an asset-based or per-account basis; (ii) compensate intermediaries for providing Fund shareholder trading information; (iii) make one-time or periodic payments to reimburse selected intermediaries for items such as ticket charges (i.e., fees that an intermediary charges its representatives for effecting transactions in Fund shares) or exchange order, operational charges (e.g., fees that an intermediary charges for establishing the Fund on its trading system), and literature printing and/or distribution costs; (iv) at the direction of a retirement plan's sponsor, reimburse or pay direct expenses of an employee benefit plan that would otherwise be payable by the plan; and (v) provide payments to broker-dealers to help defray their technology or infrastructure costs.

When not provided for in a marketing support or program servicing agreement, the Investment Adviser, Sub-Adviser and/or its affiliates may also pay intermediaries for enabling the Investment Adviser, Sub-Adviser and/or its affiliates to participate in and/or present at conferences or seminars, sales or training programs for invited registered representatives and other intermediary employees, client and investor events and other intermediary-sponsored events, and for travel expenses, including lodging incurred by registered representatives and other employees in connection with prospecting, asset retention and due diligence trips. These payments may vary depending upon the nature of the event. The Investment Adviser, Sub-Adviser and/or its affiliates make payments for such events as it deems appropriate, subject to its internal guidelines and applicable law.

The Investment Adviser, Sub-Adviser and/or its affiliates occasionally sponsor due diligence meetings for registered representatives during which they receive updates on the Fund and are afforded the opportunity to speak with portfolio managers. Although invitations to these meetings are not conditioned on selling a specific number of shares, those who have shown an interest in the Fund are more likely to be considered. To the extent permitted by their firm's policies and procedures, all or a portion of registered representatives' expenses in attending these meetings may be covered by the Investment Adviser, Sub-Adviser and/or its affiliates.

The amounts of payments referenced above made by the Investment Adviser, Sub-Adviser and/or its affiliates could be significant and may create an incentive for an intermediary or its representatives to recommend or offer shares of the Fund to its customers. The intermediary may elevate the prominence or profile of the Fund within the intermediary's organization by, for example, placing the Fund on a list of preferred or recommended funds and/or granting the Investment Adviser, Sub-Adviser and/or its affiliates preferential or enhanced opportunities to promote the Fund in various ways within the intermediary's organization. These payments are made pursuant to negotiated agreements with intermediaries. The payments do not change the price paid by investors for the purchase of a share or the amount the Fund will receive as proceeds from such sales. Furthermore, many of these payments are not reflected in the fees and expenses listed in the fee table section of the Fund's Prospectus because they are not paid by the Fund. The types of payments described herein are not mutually exclusive, and a single intermediary may receive some or all types of payments as described.

Other compensation may be offered to the extent not prohibited by state laws or any self-regulatory agency, such as FINRA. Investors can ask their intermediaries for information about any payments they receive from the Investment Adviser, Sub-Adviser and/or its affiliates and the services it provides for those payments. Investors may wish to take intermediary payment arrangements into account when considering and evaluating any recommendations relating to Fund shares.

PROXY VOTING POLICIES AND PROCEDURES

The Board has delegated responsibility for decisions regarding proxy voting for securities held by the Fund to the Sub-Adviser. The Sub-Adviser will vote such proxies in accordance with its proxy voting policies and procedures. Copies of the Fund’s and Sub-Adviser’s proxy policies and procedures are included as Appendix A to this SAI.

The Fund is required to file Form N-PX, with its complete proxy voting record for the twelve months ended June 30, no later than August 31 of each year. The Fund’s Form N-PX filing, once available, will be available: (i) without charge, upon request, by calling the Fund at 1-(888) 884-8810 or (ii) by visiting the SEC’s website at *www.sec.gov*.

CONTROL PERSONS AND PRINCIPAL SHAREHOLDERS

As of August 31, 2024 the following persons had a greater than 5% interest in the Fund.

Name and Address:	Percentage Ownership of the Fund	Percentage Ownership of Class Y
NFS LLC FBO Shareholder 499 Washington Blvd Jersey City, NJ 07310	6.35%	6.35%
NFS LLC FBO Shareholder 499 Washington Blvd Jersey City, NJ 07310	5.08%	5.08%

FINANCIAL STATEMENTS

The Fund’s audited financial statements and financial highlights for the fiscal year ended June 30, 2024 (including the report of Cohen & Company Ltd., the Fund’s independent registered public accounting firm) are available in the Fund’s Annual Report and are incorporated by reference into this SAI. No other parts of the Annual Report are incorporated by reference herein. You may obtain the Annual Report free of charge by writing to the Fund, c/o UMB Fund Services, Inc., 235 West Galena Street, Milwaukee, WI 53212, by calling the Fund toll-free at 1-(888) 884-8810 or by following the above hyperlink.

APPENDIX A — PROXY VOTING POLICIES AND PROCEDURES

Proxy Voting Policy and Procedures

Proxy Voting Procedures

Rule 206(4)-6 of the Advisers Act requires a registered investment adviser that exercises voting authority with respect to client securities to: (i) adopt written policies reasonably designed to ensure that the investment adviser votes in the best interest of its clients and addresses how the investment adviser will deal with material conflicts of interest that may arise between the investment adviser and its clients; (ii) disclose to its clients information about such policies and procedures; and (iii) upon request, provide information on how proxies were voted.

For its non-discretionary clients, Skypoint Capital Advisers, LLC (“Skypoint” or the “Adviser”) does not have authority to vote client securities. These clients will receive their proxies, corporate actions, consents and other solicitations directly from their custodian or the relevant issuer or investment fund. These clients may contact their client service professionals with questions about a particular solicitation.

For its discretionary clients, the Adviser generally takes responsibility for ensuring that proxies solicited by, or with respect to, the issuers of securities held in the client’s investment account, and corporate actions and consents sought by such issuers (including tender offers and rights offerings) are voted. In most cases, the managers of the commingled funds and separate accounts holding the assets vote the proxy solicitations. However, the Adviser will take such action in limited circumstances which may include private partnership amendments and consents and in the event that an individual security is held by the client outside of a commingled fund or separate account where the manager votes the securities. the Adviser’s discretionary clients may also retain the right to vote any proxies or take action relating to specified securities held in the client’s investment account, provided the client gives timely written notice to the Adviser.

The Adviser will not put its own interests ahead of those of any of its client and will resolve any possible conflicts between its interests and those of the client in favor of the client. When voting proxies, the Adviser follows procedures designed to identify and address material conflicts of interest that may arise between its interests and those of its clients. Accordingly, prior to voting any proxy, the Adviser will determine whether a material conflict of interest exists. A conflict of interest will be considered material to the extent that it is determined that the conflict has the potential to influence the Adviser’s decision making in voting the proxy. If the Adviser determines that there is a material conflict of interest related to the proxy solicitation, the Adviser will take appropriate action to resolve the conflict which may include abstaining from a particular vote.

The Adviser will seek to act solely in the best interests of its clients when exercising its voting authority. the Adviser determines whether and how to vote proxies on a case-by-case basis. In making such determination, the Adviser: (i) will attempt to consider all aspects of the vote that could affect the value of the issuer or that of the relevant client, (ii) will vote in a manner that it believes is consistent with the relevant client’s stated objectives, (iii) generally will vote in accordance with the recommendation of the issuing company’s management on routine and administrative matters, unless the Adviser has a particular reason to vote to the contrary, and (iv) may not vote at all to the extent the outcome of the vote or action does not have a material impact on the issuer or value of its securities.

Under Rule 204-2 under the Advisers Act, the Adviser must retain: (i) its voting policies and procedures; (ii) corporate action and proxy statements received; (iii) records of votes cast; (iv) records of client requests for voting information; and (v) any documents prepared by the Adviser that were material to making a decision on how to vote. Under the circumstances where the Adviser votes a proxy, corporate action or consent solicited by an issuer of securities or an investment fund, the Adviser will document and maintain its voting record.

For private investment funds, the Adviser may accept a seat on an advisory board or similar group for a fund in which one or more Skypoint clients have invested. the Adviser believes advisory board service benefits its clients by allowing the Adviser greater insight into the fund and its strategies and that, in general, the interests of its clients as investors will be aligned with the interests of all investors in the fund. However, if the interests of the Adviser’s clients were to diverge from the interests of each other, the Adviser representative will take appropriate action to resolve the conflict which may include abstaining from a particular vote.

FELICITAS GLOBAL PARTNERS, LLC

PROXY VOTING POLICY

June 28, 2023

65 North Raymond Avenue, Suite 315, Pasadena, CA 91103 | Telephone: 310.461.8990

This material is the property of Felicitas Global Partners, LLC (referred to herein as the “**Company**” or “**Firm**”) and must be returned to the Company if your employment or association with the Company is terminated for any reason. The contents of this material are confidential, and should not be revealed to third parties.

A. Proxy Voting

1. General

The Company's provisions related to proxy voting will be characteristic of each Client's respective agreements.

For the Company's Clients that are pooled investment vehicles and separately managed accounts, the Company neither asks for, nor accepts voting authority for client securities. Fund and SMA Clients will receive proxies directly from the issuer of the security of the custodian. Fund and SMA Clients should direct all proxy questions to the issuer of the security. If the Company decides to accept proxy voting authority in the future for these Client Types, it will amend its proxy voting policy accordingly.

As outlined in the sub-advisory agreement, the Company in its capacity as a Sub-Adviser to a Registered Fund shall be responsible for: (i) directing how the Registered Fund should vote proxies solicited by issuers of securities and other investments beneficially owned by the Registered Fund, and (ii) making any elections relative to any mergers, acquisitions, tender offers, bankruptcy proceedings or other type events pertaining to the securities and other investments held by the Registered Fund.

In the event that the Adviser were to participate in proxy voting with respect to the closed-end investment company ("Registered Closed-End Fund"), the Adviser has adopted the following Proxy Voting Policies.

The Company is responsible for voting proxies for all portfolio securities of a Registered Closed-End Fund and keeping certain records relating to how the proxies were voted as required by the Advisers Act and Proxy Rule under the 1940 Act. The Registered Closed-End Funds' administrator will prepare and file, based on such record, Form N-PX on an annual basis with the SEC no later than August 31 of each year.

As a fiduciary, an investment adviser with proxy voting authority has a duty to monitor corporate events and to vote proxies, as well as a duty to cast votes in the best interest of clients and not subrogate client interests to its own interests. Rule 206(4)-6 under the Advisers Act (the "*Proxy Voting Rule*") places specific requirements on registered investment advisers with proxy voting authority. To meet the obligations under this rule, the Company has adopted and implemented policies and procedures ("*Proxy Voting Policy*") reasonably designed to ensure the Company votes proxies in the best interest of its Clients and address how it will resolve any conflict of interest that may arise when voting proxies. Additionally, the Company will: (i) maintain certain records required to be maintained by the Proxy Voting Rule relating to all voted proxies; (ii) disclose its proxy voting policies and procedures to Clients and upon request providing Clients with a copy of it; and (iii) inform Clients as to how they can obtain information from the Company as to how their securities were voted.

The Company shall vote proxies solicited by or with respect to the issuers of securities in which assets of a Client portfolio are invested, unless: (i) the Client is subject to ERISA and the Advisory Contract between the Company and the Client expressly precludes the voting of proxies by the Company; (ii) the Client is not subject to ERISA and the Client otherwise instructs the Company; or (iii) the Company has responsibility for proxy voting and, in the Company's judgment, the cost or disadvantages of voting the proxy would exceed the anticipated benefit to the Client. If the Client does not grant direct voting authority to the Company, Clients will not receive information about their proxies from the Company. Instead, Clients will be instructed to receive proxies from their custodian, transfer agent or other third-party service providers such as their proxy service provider.

2. Primary Consideration in Voting

When the Company votes a Client's proxy with respect to a specific issuer, a Client's economic interest as a shareholder of that issuer is the Company's primary consideration in determining how proxies should be voted. The Company will not consider interests of the Company, other stakeholders of the issuer or interests the Client may have in other capacities. The Company shall vote proxies with the goal of maximizing the value of the securities in Client portfolios.

Generally, the Company votes proposals in accordance with these guidelines but, consistent with its "principles-based" approach to proxy voting, the Company may deviate from the guidelines if warranted by the specific facts and circumstances of the situation (*i.e.*, if, under the circumstances, the Company believes that deviating from its stated policy is necessary to help maximize long-term shareholder value). In addition, these guidelines are not intended to address all issues that may appear on all proxy ballots. The Company will evaluate on a case-by-case basis any

proposal not specifically addressed by these guidelines, whether submitted by management or shareholders, always keeping in mind the Company's fiduciary duty to make voting decisions that, by maximizing long-term shareholder value, are in the Clients' best interests.

3. Engagement of Service Provider

The Company may engage one or more independent third-party proxy advisory firms ("*Proxy Firm*") to (i) make recommendations to the Company of proxy voting policies for adoption by the Company; (ii) perform research and make recommendations to the Company as to particular shareholder votes being solicited; (iii) perform the administrative tasks of receiving proxies and proxy statements, marking proxies as instructed by the Company and delivering those proxies; (iv) retain proxy voting records and information; and (v) report to the Company on its activities. In no circumstances shall a Proxy Firm have the authority to vote proxies except in accordance with standing or specific instructions given to it by the Company. The Company shall retain final authority and fiduciary responsibility for the voting of proxies.

4. Proxy Voting Guidelines

The Firm's proxy voting procedures are designed to ensure that proxies are voted in a manner that is in the best interest of the Client.

The majority of proxy-related issues generally fall within the following five categories:

- corporate governance
- takeover defenses
- compensation plans
- capital structure
- social responsibility

The Company's proxy voting guidelines are both principles-based and rules-based. The Company adheres to a core set of principles that are described in this Proxy Voting Policy and assesses each proxy proposal in light of these principles. The Company's proxy voting "litmus test" will always be what it views as most likely to maximize long-term shareholder value. The Company believes that the authority and accountability for setting and executing corporate policies, goals and compensation generally should rest with the board of directors and senior management. In return, the Company supports strong investor rights that allow shareholders to hold directors and management accountable if they fail to act in the best interests of shareholders.

The Firm will generally vote in favor of matters that follow an agreeable corporate strategic direction, support an ownership structure that enhances shareholder value without diluting management's accountability to shareholders and/or present compensation plans that are commensurate with enhanced manager performance and market practices.

Generally, the Company will vote in favor of routine corporate housekeeping proposals, including election of directors (where no corporate governance issues are implicated), selection of auditors, and increases in or reclassification of common stock.

Generally, the Company votes in accordance with these guidelines but, consistent with its "principles-based" approach to proxy voting, the Company may deviate from the guidelines if warranted by the specific facts and circumstances of the situation (*i.e.*, if, under the circumstances, the Company believes that deviating from its stated policy is necessary to help maximize long-term shareholder value). In addition, these guidelines are not intended to address all issues that may appear on all proxy ballots. The Company will evaluate on a case-by-case basis any proposal not specifically addressed by these guidelines, whether submitted by management or shareholders, always keeping in mind the Company's fiduciary duty to make voting decisions that, by maximizing long-term shareholder value, are in the Clients' best interests.

The proxy voting guidelines provide that the Company will generally vote for or against various proxy proposals, usually based upon certain specified criteria.

As an example, the guidelines provide that the Company will generally vote in favor of proposals to:

- Repeal existing classified boards and elect directors on an annual basis;
- Adopt a written majority voting or withhold policy (in situations in which a company has not previously adopted such a policy);
- Lower supermajority shareholder vote requirements for charter and bylaw amendments;
- Lower supermajority shareholder vote requirements for mergers and other business combinations;
- Increase common share authorizations for a stock split;
- Implement a reverse stock split;
- Approve an ESOP (employee stock ownership plan) or other broad-based employee stock purchase or ownership plan, or increase authorized shares for existing plans; and
- Adopt certain social and environmental issues regarding discrimination, disclosures of environmental impact, animal treatment and corporate sustainability, when appropriate.

The proxy voting guidelines also provide that the Company will generally vote against proposals to:

- Elect director nominees that sit on more than six public company boards, or, if the nominee is a CEO, more than three public company boards;
- Classify the board of directors;
- Require that poison pill plans be submitted for shareholder ratification;
- Adopt dual class exchange offers or dual class recapitalizations;
- Require a supermajority shareholder vote to approve mergers and other significant business combinations;
- Require a supermajority shareholder vote to approve charter and bylaw amendments; and
- Adopt certain social and environmental proposals deemed unwarranted by the company's board of directors.

In certain circumstances, the guidelines provide that proxy proposals will be addressed on a case-by-case basis, including those regarding executive and director compensation plans, mergers and acquisitions, ratification of poison pill plans, a change in the company's state of incorporation and an increase in authorized common stock.

For other proposals, the Company shall determine whether a proposal is in the best interests of its Clients to maximize long-term shareholder value and may take into account the following factors, among others:

- whether the proposal was recommended by management and the Adviser's opinion of management;
- whether the proposal acts to entrench existing management; and
- whether the proposal fairly compensates management for past and future performance.

While proxy voting on all issues presented should be considered, voting on all issues is not required. Some issues presented for a proxy vote of security holders are not deemed relevant to the Firm's voting objective, or it is not reasonably possible to ascertain what effect, if any, a vote on a given issue may have on a Client's investment. Additionally, the Firm may decide that avoiding further expense and investigation and not voting at all on a presented proposal may be in the best interest of a Client. Accordingly, the Firm may abstain from voting in certain circumstances.

5. Conflicts of Interest

Conflicts of interest involved in a proxy vote shall be addressed through the following three-step process:

i. Identification of all potential conflicts of interest

Examples of potential conflicts of interest include:

- The Company or an affiliate manages a pension plan, administers Employee benefit plans, or provides brokerage, underwriting, insurance, or banking services to a Company whose management is soliciting proxies;
- The Company or an affiliate has a substantial business relationship (separate from the Company's investment strategy) with a portfolio company or a proponent of a proxy proposal and this business relationship may influence how the proxy vote is cast;
- The Company or an affiliate has a business relationship (separate from the Company's investment strategy) or personal relationship with participants in a proxy contest, corporate directors or candidates for directorships; or
- An officer or Employee of the Company or an affiliate may have a familial relationship to a portfolio company (e.g. a spouse or other relative who serves as a director of a public company).

ii. Determination of material conflicts

The SEC has not provided any specific guidance as to how an investment adviser should analyze or determine whether a conflict is "material" for purposes of proxy voting. Thus, traditional analysis of questions of materiality under the federal securities laws should be used.

iii. Establishment of procedures to address material conflicts

If a material conflict of interest with respect to a particular vote is encountered, contact the CCO to determine how to vote the proxy consistent with the best interests of a Client and in a manner not affected by any conflicts of interest.

6. Recordkeeping

Pursuant to Rule 204-2, the Company shall retain the following five types of records relating to proxy voting:

- Proxy voting policy and procedures;
- Proxy statements received for Client securities;
- Records of votes cast on behalf of Clients;
- Written client requests for proxy voting information and written adviser responses to any client request (whether oral or written) for proxy voting information; and
- Any documents prepared by the Company that were material to making a proxy voting decision or that memorialized the basis for the decision.

7. Review

The Company and the CCO shall be responsible for the periodic, but at least annual, review of the Company's proxy voting policies and procedures to ensure that they have been formulated reasonably and implemented effectively, including whether such policies and procedures continue to be reasonably designed to ensure that proxy votes cast on behalf of Clients is in the best interest of such Clients.

8. Policy Statement and Requests

The Company shall make a summary of this Proxy Voting Policy available to Clients on at least an annual basis. Such summary will be contained in the Company's Form ADV Brochure. Additionally, CCO shall work with the Trust CCO, as required or requested, to ensure the Funds disclose in their statements of additional information or on Form N-CSR, as applicable, a summary of this Proxy Voting Policy and the policies and procedures that are used to vote proxies relating to securities held in their portfolios. The Company shall also make the entire Proxy Voting Policy and the Company's proxy voting records with respect to a Client's account available to that Client or its representatives for review and discussion upon the Client's request or as may be required by applicable law. The Company generally will not disclose publicly its past votes, share amounts voted or held or how it intends to vote on behalf of a Client account except as required by applicable law, but may disclose such information to a Client who itself may decide or may be required to make public such information. Upon a request from a person other than a Client for information on the Company's proxy voting, Company personnel are prohibited from disclosing such information unless otherwise directed to do so by a Client, in which case Company personnel shall direct the requesting party to the CCO who will handle the request.

Questions related to this Proxy Voting Policy, the proxy voting process and/or information regarding how the Company voted proxies relating to a Client's portfolio of securities may be obtained by Clients, free of charge, by contacting the CCO at (310) 651-8992 or bonar@felicitasgp.com.

APPENDIX B — RATINGS OF INVESTMENTS

DESCRIPTION OF SECURITIES RATINGS

Short-Term Credit Ratings

An *S&P Global Ratings* short-term issue credit rating is generally assigned to those obligations considered short-term in the relevant market. The following summarizes the rating categories used by S&P Global Ratings for short-term issues:

“A-1” — A short-term obligation rated “A-1” is rated in the highest category by S&P Global Ratings. The obligor’s capacity to meet its financial commitments on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor’s capacity to meet its financial commitment on these obligations is extremely strong.

“A-2” — A short-term obligation rated “A-2” is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor’s capacity to meet its financial commitments on the obligation is satisfactory.

“A-3” — A short-term obligation rated “A-3” exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken an obligor’s capacity to meet its financial commitments on the obligation.

“B” — A short-term obligation rated “B” is regarded as vulnerable and has significant speculative characteristics. The obligor currently has the capacity to meet its financial commitments; however, it faces major ongoing uncertainties that could lead to the obligor’s inadequate capacity to meet its financial commitments.

“C” — A short-term obligation rated “C” is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation.

“D” — A short-term obligation rated “D” is in default or in breach of an imputed promise. For non-hybrid capital instruments, the “D” rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within any stated grace period. However, any stated grace period longer than five business days will be treated as five business days. The “D” rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. A rating on an obligation is lowered to “D” if it is subject to a distressed debt restructuring.

Local Currency and Foreign Currency Ratings — S&P Global Ratings’ issuer credit ratings make a distinction between foreign currency ratings and local currency ratings. A foreign currency rating on an issuer can differ from the local currency rating on it when the obligor has a different capacity to meet its obligations denominated in its local currency, versus obligations denominated in a foreign currency.

“NR” — This indicates that a rating has not been assigned or is no longer assigned.

Moody’s Investors Service (“Moody’s”) short-term ratings are forward-looking opinions of the relative credit risks of financial obligations with an original maturity of thirteen months or less and reflect both on the likelihood of a default or impairment on contractual financial obligations and the expected financial loss suffered in the event of default or impairment.

Moody’s employs the following designations to indicate the relative repayment ability of rated issuers:

“P-1” — Issuers (or supporting institutions) rated Prime-1 reflect a superior ability to repay short-term obligations.

“P-2” — Issuers (or supporting institutions) rated Prime-2 reflect a strong ability to repay short-term obligations.

“P-3” — Issuers (or supporting institutions) rated Prime-3 reflect an acceptable ability to repay short-term obligations.

“NP” — Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

“NR” — Is assigned to an unrated issuer, obligation and/or program.

Fitch, Inc./Fitch Ratings Ltd. (“Fitch”) short-term issuer or obligation rating is based in all cases on the short-term vulnerability to default of the rated entity and relates to the capacity to meet financial obligations in accordance with the documentation governing the relevant obligation. Short-term deposit ratings may be adjusted for loss severity. Short-term ratings are assigned to obligations whose initial maturity is viewed as “short-term” based on market convention.¹ Typically, this means up to 13 months for corporate, sovereign, and structured obligations and up to 36 months for obligations in U.S. public finance markets. The following summarizes the rating categories used by Fitch for short-term obligations:

“F1” — Securities possess the highest short-term credit quality. This designation indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added “+” to denote any exceptionally strong credit feature.

“F2” — Securities possess good short-term credit quality. This designation indicates good intrinsic capacity for timely payment of financial commitments.

“F3” — Securities possess fair short-term credit quality. This designation indicates that the intrinsic capacity for timely payment of financial commitments is adequate.

“B” — Securities possess speculative short-term credit quality. This designation indicates minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near term adverse changes in financial and economic conditions.

“C” — Securities possess high short-term default risk. Default is a real possibility.

“RD” — Restricted default. Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Typically applicable to entity ratings only.

“D” — Default. Indicates a broad-based default event for an entity, or the default of a short-term obligation.

“NR” — Is assigned to an issue of a rated issuer that are not and have not been rated.

The *DBRS Morningstar® Ratings Limited (“DBRS Morningstar”)* short-term obligation ratings provide DBRS Morningstar’s opinion on the risk that an issuer will not meet its short-term financial obligations in a timely manner. The obligations rated in this category typically have a term of shorter than one year. The R-1 and R-2 rating categories are further denoted by the subcategories “(high)”, “(middle)”, and “(low)”.

The following summarizes the ratings used by DBRS Morningstar for commercial paper and short-term debt:

“**R-1 (high)**” — Short-term debt rated “R-1 (high)” is of the **highest credit quality. The capacity for the payment of short-term financial obligations** as they fall due is exceptionally high. Unlikely to be adversely affected by future events.

“**R-1 (middle)**” — Short-term debt rated “R-1 (middle)” is of superior credit quality. The capacity for the payment of short-term financial obligations as they fall due is very high. Differs from “R-1 (high)” by a relatively modest degree. Unlikely to be significantly vulnerable to future events.

“**R-1 (low)**” — Short-term debt rated “R-1 (low)” is of **good credit quality**. The capacity for the payment of short-term financial obligations as they fall due is substantial. Overall strength is not as favorable as higher rating categories. May be vulnerable to future events, but qualifying negative factors are considered manageable.

“**R-2 (high)**” — **Short-term debt rated “R-2 (high)” is considered to be at the upper end of adequate credit quality. The capacity for the payment of short-term financial obligations as they fall due is acceptable. May be vulnerable to future events.**

“**R-2 (middle)**” — **Short-term debt rated “R-2 (middle)” is considered to be of adequate credit quality. The capacity for the payment of short-term financial obligations as they fall due is acceptable. May be vulnerable to future events or may be exposed to other factors that could reduce credit quality.**

¹ A long-term rating can also be used to rate an issue with short maturity.

“R-2 (low)” — Short-term debt rated “R-2 (low)” is considered to be at the lower end of adequate credit quality. The capacity for the payment of short-term financial obligations as they fall due is acceptable. May be vulnerable to future events. A number of challenges are present that could affect the issuer’s ability to meet such obligations.

“R-3” — Short-term debt rated “R-3” is considered to be at the lowest end of adequate credit quality. There is a capacity for the payment of short-term financial obligations as they fall due. May be vulnerable to future events, and the certainty of meeting such obligations could be impacted by a variety of developments.

“R-4” — Short-term debt rated “R-4” is considered to be of speculative credit quality. The capacity for the payment of short-term financial obligations as they fall due is uncertain.

“R-5” — Short-term debt rated “R-5” is considered to be of highly speculative credit quality. There is a high level of uncertainty as to the capacity to meet short-term financial obligations as they fall due.

“D” — A downgrade to “D” may occur when the issuer has filed under any applicable bankruptcy, insolvency or winding-up statute, or there is a failure to satisfy an obligation after the exhaustion of grace periods. DBRS Morningstar may also use “SD” (Selective Default) in cases where only some securities are impacted, such as the case of a “distressed exchange”.

Long-Term Issue Credit Ratings

The following summarizes the ratings used by *S&P Global Ratings* for long-term issues:

“AAA” — An obligation rated “AAA” has the highest rating assigned by S&P Global Ratings. The obligor’s capacity to meet its financial commitments on the obligation is extremely strong.

“AA” — An obligation rated “AA” differs from the highest-rated obligations only to a small degree. The obligor’s capacity to meet its financial commitments on the obligation is very strong.

“A” — An obligation rated “A” is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor’s capacity to meet its financial commitments on the obligation is still strong.

“BBB” — An obligation rated “BBB” exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken the obligor’s capacity to meet its financial commitments on the obligation.

“BB,” “B,” “CCC,” “CC” and “C” — Obligations rated “BB,” “B,” “CCC,” “CC” and “C” are regarded as having significant speculative characteristics. “BB” indicates the least degree of speculation and “C” the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposure to adverse conditions.

“BB” — An obligation rated “BB” is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions that could lead to the obligor’s inadequate capacity to meet its financial commitments on the obligation.

“B” — An obligation rated “B” is more vulnerable to nonpayment than obligations rated “BB”, but the obligor currently has the capacity to meet its financial commitments on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor’s capacity or willingness to meet its financial commitments on the obligation.

“CCC” — An obligation rated “CCC” is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitments on the obligation.

“CC” — An obligation rated “CC” is currently highly vulnerable to nonpayment. The “CC” rating is used when a default has not yet occurred but S&P Global Ratings expects default to be a virtual certainty, regardless of the anticipated time to default.

“C” — An obligation rated “C” is currently highly vulnerable to nonpayment, and the obligation is expected to have lower relative seniority or lower ultimate recovery compared with obligations that are rated higher.

“D” — An obligation rated “D” is in default or in breach of an imputed promise. For non-hybrid capital instruments, the “D” rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within the next five business days in the absence of a stated grace period or within the earlier of the stated grace period or the next 30 calendar days. The “D” rating also will be used upon the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. A rating on an obligation is lowered to “D” if it is subject to a distressed debt restructuring

Plus (+) or minus (-) — Ratings from “AA” to “CCC” may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the rating categories.

“NR” — This indicates that a rating has not been assigned, or is no longer assigned.

Local Currency and Foreign Currency Ratings — S&P Global Ratings’ issuer credit ratings make a distinction between foreign currency ratings and local currency ratings. A foreign currency rating on an issuer can differ from the local currency rating on it when the obligor has a different capacity to meet its obligations denominated in its local currency, versus obligations denominated in a foreign currency.

Moody’s long-term ratings are forward-looking opinions of the relative credit risks of financial obligations with an original maturity of eleven months or more. Such ratings reflect both on the likelihood of default or impairment on contractual financial obligations and the expected financial loss suffered in the event of default or impairment. The following summarizes the ratings used by *Moody’s* for long-term debt:

“Aaa” — Obligations rated “Aaa” are judged to be of the highest quality, subject to the lowest level of credit risk.

“Aa” — Obligations rated “Aa” are judged to be of high quality and are subject to very low credit risk.

“A” — Obligations rated “A” are judged to be upper-medium grade and are subject to low credit risk.

“Baa” — Obligations rated “Baa” are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

“Ba” — Obligations rated “Ba” are judged to be speculative and are subject to substantial credit risk.

“B” — Obligations rated “B” are considered speculative and are subject to high credit risk.

“Caa” — Obligations rated “Caa” are judged to be speculative of poor standing and are subject to very high credit risk.

“Ca” — Obligations rated “Ca” are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

“C” — Obligations rated “C” are the lowest rated and are typically in default, with little prospect for recovery of principal or interest.

Note: *Moody’s* appends numerical modifiers 1, 2, and 3 to each generic rating classification from “Aa” through “Caa.” The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

“NR” — Is assigned to unrated obligations, obligation and/or program.

The following summarizes long-term ratings used by *Fitch*:

“AAA” — Securities considered to be of the highest credit quality. “AAA” ratings denote the lowest expectation of credit risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

“AA” — Securities considered to be of very high credit quality. “AA” ratings denote expectations of very low credit risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

“A” — Securities considered to be of high credit quality. “A” ratings denote expectations of low credit risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

“BBB” — Securities considered to be of good credit quality. “BBB” ratings indicate that expectations of credit risk are currently low. The capacity for payment of financial commitments is considered adequate, but adverse business or economic conditions are more likely to impair this capacity.

“BB” — Securities considered to be speculative. “BB” ratings indicates an elevated vulnerability to credit risk, particularly in the event of adverse changes in business or economic conditions over time; however, business or financial alternatives may be available to allow financial commitments to be met.

“B” — Securities considered to be highly speculative. “B” ratings indicate that material credit risk is present

“CCC” — A “CCC” rating indicates that substantial credit risk is present.

“CC” — A “CC” rating indicates very high levels of credit risk.

“C” — A “C” rating indicates exceptionally high levels of credit risk.

Defaulted obligations typically are not assigned “RD” or “D” ratings but are instead rated in the “CCC” to “C” rating categories, depending on their recovery prospects and other relevant characteristics. Fitch believes that this approach better aligns obligations that have comparable overall expected loss but varying vulnerability to default and loss.

Plus (+) or minus (-) may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the “AAA” obligation rating category, or to corporate finance obligation ratings in the categories below “CCC”.

“NR” — Is assigned to an unrated issue of a rated issuer.

The *DBRS* Morningstar long-term obligation ratings provide DBRS Morningstar’s opinion on the risk that investors may not be repaid in accordance with the terms under which the long-term obligation was issued. The obligations rated in this category typically have a term of one year or longer. All rating categories from AA to CCC contain subcategories “(high)” and “(low)”. The absence of either a “(high)” or “(low)” designation indicates the rating is in the middle of the category. The following summarizes the ratings used by DBRS Morningstar for long-term debt:

“AAA” — Long-term debt rated “AAA” is of the highest credit quality. The capacity for the payment of financial obligations is exceptionally high and unlikely to be adversely affected by future events.

“AA” — Long-term debt rated “AA” is of superior credit quality. The capacity for the payment of financial obligations is considered high. Credit quality differs from “AAA” only to a small degree. Unlikely to be significantly vulnerable to future events.

“A” — Long-term debt rated “A” is of good credit quality. The capacity for the payment of financial obligations is substantial, but of lesser credit quality than “AA.” May be vulnerable to future events, but qualifying negative factors are considered manageable.

“BBB” — Long-term debt rated “BBB” is of adequate credit quality. The capacity for the payment of financial obligations is considered acceptable. May be vulnerable to future events.

“BB” — Long-term debt rated “BB” is of speculative, non-investment grade credit quality. The capacity for the payment of financial obligations is uncertain. Vulnerable to future events.

“B” — Long-term debt rated “B” is of highly speculative credit quality. There is a high level of uncertainty as to the capacity to meet financial obligations.

“CCC”, “CC” and “C” — Long-term debt rated in any of these categories is of very highly speculative credit quality. In danger of defaulting on financial obligations. There is little difference between these three categories, although “CC” and “C” ratings are normally applied to obligations that are seen as highly likely to default or subordinated to obligations rated in the “CCC” to “B” range. Obligations in respect of which default has not technically taken place but is considered inevitable may be rated in the “C” category.

“D” — A downgrade to “D” may occur when the issuer has filed under any applicable bankruptcy, insolvency or winding up statute or there is a failure to satisfy an obligation after the exhaustion of grace periods. DBRS Morningstar may also use “SD” (Selective Default) in cases where only some securities are impacted, such as the case of a “distressed exchange”.

Municipal Note Ratings

An **S&P Global Ratings** U.S. municipal note rating reflects S&P Global Ratings’ opinion about the liquidity factors and market access risks unique to the notes. Notes due in three years or less will likely receive a note rating. Notes with an original maturity of more than three years will most likely receive a long-term debt rating. In determining which type of rating, if any, to assign, S&P Global Ratings’ analysis will review the following considerations:

- Amortization schedule — the larger the final maturity relative to other maturities, the more likely it will be treated as a note; and
- Source of payment — the more dependent the issue is on the market for its refinancing, the more likely it will be treated as a note.

Municipal Short-Term Note rating symbols are as follows:

“SP-1” — A municipal note rated “SP-1” exhibits a strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation.

“SP-2” — A municipal note rated “SP-2” exhibits a satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

“SP-3” — A municipal note rated “SP-3” exhibits a speculative capacity to pay principal and interest.

“D” — This rating is assigned upon failure to pay the note when due, completion of a distressed debt restructuring, or the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions.

Moody’s uses the global short-term Prime rating scale (listed above under Short-Term Credit Ratings) for commercial paper issued by U.S. municipalities and nonprofits. These commercial paper programs may be backed by external letters of credit or liquidity facilities, or by an issuer’s self-liquidity.

For other short-term municipal obligations, Moody’s uses one of two other short-term rating scales, the Municipal Investment Grade (“MIG”) and Variable Municipal Investment Grade (“VMIG”) scales provided below.

Moody’s uses the MIG scale for U.S. municipal cash flow notes, bond anticipation notes and certain other short-term obligations, which typically mature in three years or less.

MIG Scale

“MIG-1” — This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

“MIG-2” — This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

“MIG-3” — This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

“SG” — This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

“NR” — Is assigned to an unrated obligation, obligation and/or program.

In the case of variable rate demand obligations (“VRDOs”), Moody’s assigns both a long-term rating and a short-term payment obligation rating. The long-term rating addresses the issuer’s ability to meet scheduled principal and interest payments. The short-term payment obligation rating addresses the ability of the issuer or the liquidity provider to

meet any purchase price payment obligation resulting from optional tenders (“on demand”) and/or mandatory tenders of the VRDO. The short-term payment obligation rating uses the VMIG scale. Transitions of VMIG ratings with conditional liquidity support differ from transitions of Prime ratings reflecting the risk that external liquidity support will terminate if the issuer’s long-term rating drops below investment grade.

Moody’s typically assigns the VMIG rating if the frequency of the payment obligation is less than every three years. If the frequency of the payment obligation is less than three years but the obligation is payable only with remarketing proceeds, the VMIG short-term rating is not assigned and it is denoted as “NR”.

“VMIG-1” — This designation denotes superior credit quality. Excellent protection is afforded by the superior short-term credit strength of the liquidity provider and structural and legal protections.

“VMIG-2” — This designation denotes strong credit quality. Good protection is afforded by the strong short-term credit strength of the liquidity provider and structural and legal protections.

“VMIG-3” — This designation denotes acceptable credit quality. Adequate protection is afforded by the satisfactory short-term credit strength of the liquidity provider and structural and legal protections.

“SG” — This designation denotes speculative-grade credit quality. Demand features rated in this category may be supported by a liquidity provider that does not have a sufficiently strong short-term rating or may lack the structural and/or legal protections.

“NR” — Is assigned to an unrated obligation, obligation and/or program.

About Credit Ratings

An **S&P Global Ratings** issue credit rating is a forward-looking opinion about the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations, or a specific financial program (including ratings on medium-term note programs and commercial paper programs). It takes into consideration the creditworthiness of guarantors, insurers, or other forms of credit enhancement on the obligation and takes into account the currency in which the obligation is denominated. The opinion reflects S&P Global Ratings’ view of the obligor’s capacity and willingness to meet its financial commitments as they come due, and this opinion may assess terms, such as collateral security and subordination, which could affect ultimate payment in the event of default.

Ratings assigned on **Moody’s** global long-term and short-term rating scales are forward-looking opinions of the relative credit risks of financial obligations issued by non-financial corporates, financial institutions, structured finance vehicles, project finance vehicles, and public sector entities.

Fitch’s credit ratings are forward-looking opinions on the relative ability of an entity or obligation to meet financial commitments. Issuer Default Ratings (IDRs) are assigned to corporations, sovereign entities, financial institutions such as banks, leasing companies and insurers, and public finance entities (local and regional governments). Issue-level ratings are also assigned and often include an expectation of recovery, which may be notched above or below the issuer-level rating. Issue ratings are assigned to secured and unsecured debt securities, loans, preferred stock and other instruments. Credit ratings are indications of the likelihood of repayment in accordance with the terms of the issuance. In limited cases, Fitch may include additional considerations (i.e., rate to a higher or lower standard than that implied in the obligation’s documentation).

DBRS Morningstar offers independent, transparent, and innovative credit analysis to the market. Credit ratings are forward-looking opinions about credit risk that reflect the creditworthiness of an issuer, rated entity, security and/or obligation based on DBRS Morningstar’s quantitative and qualitative analysis in accordance with applicable methodologies and criteria. They are meant to provide opinions on relative measures of risk and are not based on expectations of, or meant to predict, any specific default probability. Credit ratings are not statements of fact. DBRS Morningstar issues credit ratings using one or more categories, such as public, private, provisional, final(ized), solicited, or unsolicited. From time to time, credit ratings may also be subject to trends, placed under review, or discontinued. DBRS Morningstar credit ratings are determined by credit rating committees.
